The SMMT List of Funding, Finance and Support Schemes

This document brings together sources of money and support useful for businesses active in the automotive sector.

This is a 'working' document, by which we mean we are constantly reviewing, adding and amending the information contained within to reflect the changing initiatives available to businesses in the UK. As such, we recommend that you always access this document on-line to ensure you are using the latest version and to always visit the schemes home website before embarking on any application activity.

The report is organised into European and national/regional schemes with each scheme being further categorised as detailed below. The loose definitions we have applied are:

- **Funding:** grants for specific projects where monies received do not need to be repaid.
- **Finance:** access to loans which is subject to repayment.
- **Support:** incentives and tax breaks, these may be direct (of benefit to your business such as enhanced capital allowances) or indirect (promoting activities that may result in benefits for your business such as the plugged in car grant)

Programme Key

Many sources of funding and finance can be used for a variety of business purposes. Where possible, and sensible, the funding/finance facility has been categorised. A [check list of schemes](#) and their categories can be found at the end of the report.

	Funding
	Financing and Loans
	Incentives & Tax Breaks
	Environmental, Low Carbon
	Internationalisation
	SME Specific
	R&D
	Other

We welcome any contribution as to schemes that should be included in this document. Suggestions should be sent to the Member Services team at memberservices@smmt.co.uk

SMMT updates this document regularly but cannot guarantee that the latest available information will be reflected here. You are strongly advised to contact the scheme provider before taking action.

Horizon 2020

Minimum award
Maximum award

Eligibility

Two year work programmes announce the specific areas that will be funded by Horizon 2020. For more details on specific calls please visit [Participant Portal](#).

Description

Horizon 2020 is the EU's biggest ever research and innovation framework programme with a seven year budget worth nearly €80 billion. Most EU research funding is allocated on the basis of competitive calls, but the budget for Horizon includes funding also for the [Joint Research Centre](#), the European Commission's in-house science service; the [European Institute for Innovation and Technology](#) and research carried out within the framework of the [Euratom Treaty](#). Separate calls will also be published under specific Partnerships with industry and with Member States.

Worth more than €15 billion over the first two years, the funding is intended to help boost Europe's knowledge-driven economy, and tackle issues that will make a difference in people's lives. This includes 12 areas that will be a focus for action in 2014/2015, including topics such as personalised healthcare, digital security and smart cities. The Commission's indication of funding priorities over the next two years is intended to provide researchers and businesses with more certainty than ever before on the direction of EU research policy. Most calls from the 2014 budget are already open for submissions with more to follow over the course of the year. Calls in the 2014 budget alone are worth around €7.8 billion, with funding focused on the three key pillars of Horizon 2020:

- Excellent Science: Around €3 billion, including €1.7 billion for grants from the European Research Council for top scientists and €800 million for Marie Skłodowska-Curie fellowships for younger researchers
- Industrial Leadership: €1.8 billion to support Europe's industrial leadership in areas like ICT, nanotechnologies, advanced manufacturing, robotics, biotechnologies and space.
- Societal challenges: €2.8 billion for innovative projects addressing Horizon 2020's seven societal challenges, broadly: health; agriculture, maritime and bioeconomy; energy; transport; climate action, environment, resource efficiency and raw materials; reflective societies; and security.

Application Information

Application process varies depending on the specific call, for more details please see [here](#).

Contact Details

Please check [here](#) to find a national contact point.

COSME

Minimum award: N/A
Maximum award: €150,000

Eligibility

All EU, EFTA and other European countries when agreements and procedures allow.
All businesses meeting the EU [definition](#) of an SME.

Description

The programme for Competitiveness of Enterprises and Small and Medium-Sized Enterprises (SMEs) is an EU led programme providing a budget of € 2.3bn to SMEs to access loans of up to €150,000. COSME will provide them with the right tools to succeed and is the successor programme to the Competitiveness and Innovation Programme 2007-2013 (CIP). COSME focuses on providing access to the services provided by the Enterprise Europe Network and local regional partners, as well as supporting entrepreneurs through the Entrepreneur 2020 Action plan. Opportunities for education, improving current business environments and providing role models and outreach to SMEs, as well as creating an environment where business creation and business growth can flourish are some of the aims of COSME. The programme will run from 2014-2020.

Additional Information

In addition to the funding available, there will be activities focused on providing entrepreneurs with developing their skills, as well as helping women and young people get the support they may need.

It is expected that almost 330,000 firms will be able to obtain loans to aide in the creation and preservation of jobs, and to be able to launch new products and services.

Application Information

Minimum duration of individual transaction is 12 months and maximum duration is 10 years. Loan facility provides SMEs with direct guarantees with financial intermediaries that are supported by the EU to cover loans.

Calls for proposals: http://ec.europa.eu/enterprise/contracts-grants/calls-for-proposals/index_en.htm

European Framework Programme FP7

Minimum award: N/A, although for Level 2 calls the minimum is €4m funding.
Maximum award: 50% of eligible costs, on a Level 1 call up to a maximum of €3m per project.

Eligibility

Open to all, however applications must be made by consortia consisting at least 3 separate legal entities across 3 different European states or associate states. Projects *must* fall within the defined themes of the 'calls'. Calls are determined by the EU and detail the project research areas and expected impact.

Description

FP7, the Seventh Framework for Research and Technologies Development is the main source of funding for research within the EU. 4 main programmes fall under FP7 (Cooperation, Ideas, People, Capacities), with the majority of funding available within Cooperation, requiring a consortium approach to projects. FP7 is running from 2007 to 2013 with a total budget of €50.5 billion. Work is currently taking place to set the agenda for the next version of the framework programme, Horizon 2020. The automotive sector can access funding for research and technology through the European Green Car Initiative, a Private Public Partnership (PPP) with a budget of €1 billion (€500m from EC FP7, the rest from industry). The Green Car Initiative covers a wide range of research topics and vehicle types. It is not just for passenger cars.

Additional Information

There were 94 proposals received in response to 2009 calls under FP6. 33% received funding with 54% of funds going to private enterprise, 16% of which went to SMEs. In general, 50% of consortium partners are found from your existing pool of contacts, 25% are contacts of contacts. Partner finding services and information days can also be useful places to find project partners. The key message, if you think Framework Programme funding could be for your organisation, is get out there and network.

Application Information

Applications must be made in response to calls for proposals. It is a competitive process with proposals being judged by a panel of experts across 3 key criteria; scientific and/or technological excellence, implementation and project impact. Proposals must score at least 3 in each category and 10 overall to be considered. Applications must be submitted electronically. Deadlines are firmly adhered to, with 17:00 (local Brussels time) being the cut off. Be warned, the system gets very busy toward the deadline and this may prevent successful submission.

Eurostars Programme

Minimum award: N/A

Maximum award: €1.5m per project

Eligibility

Open to any business that meets the EU [definition](#) of an SME and is based in a Eurostars participating country. Companies must be able to demonstrate that they invest 10% of turnover/staff effort in R&D activity. Proposals are accepted from consortia that must include 2 organisations from 2 different participating states. Any type of organisation, SME, large corporation, university or research centre can be part of the Eurostar Consortium however there are two important points:

- The lead partner must be an SME
- Large companies and academics can form part of the consortia but funding for their activities must be secured from other sources. Eurostar funds are directed to SME activity.

One final consideration, any one country is only allowed to meet 75% of project costs.

Full Eligibility details are listed here: www.eurostars-eureka.eu/eligibility

Description

The scheme promotes R&D among the SME European community. The fund is open to all sectors (other than military) with the only R&D constraint being that the project should be targeted at creating a new product, process or service. Projects must operate on a consortia basis and have a maximum duration of 3 years. Funding is available for the exploitation of close-to-market technologies. In the UK the Eurostars programme is administered by the Technology Strategy Board (TSB).

Eurostar will fund projects up to 50% of eligible costs. Eurostars doesn't operate a call system as such, there are close dates for applications when the various proposals are reviewed and the winner(s) awarded funding.

Application Information

To receive an application form you must register on the website (see links). The application form should be filled in and submitted online. While Eurostars doesn't operate a themed call process there are deadlines for application, call details can be found on the TSB website.

ERA-NET Transport Programme

Minimum award: N/A
Maximum award: call specific

Eligibility

Open to organisations willing to form a consortium to deliver projects to which their country has contributed funds.

Description

ERA-NET Transport (ENT) is a network of national ministries and supporting organisations in the field of transport research. By facilitating cooperation among publicly financed transport research programmes it is ENT's goal to improve the outcome and quality of transport research in Europe. The main mechanism is seen in the structuring of the European Research Area (ERA) for Transport.

The ENT actively seeks to encourage less-experienced partners to participate in trans-national cooperative projects and run their own calls for specific projects alongside the European Framework Programme.

Application Information

Applications should be made in response to specific calls that can be found at:
<http://www.transport-era.net/research-calls.html>

Submissions must come from consortia. Details of application requirements and application process are listed for every call. The ENT recommends that you should contact the National Contact Point as a first step. The Department for Transport is the UK ENT Partner.

Contact Details

The contact for the programme in the UK is Matthew White at the Department for Transport.
Email: matthew.white@dft.gsi.gov.uk

Fuel Cells and Hydrogen Joint Undertaking (FCH JU)

Minimum award: N/A

Maximum award: Varies by competition call

Eligibility

The FCH JU operates in a similar way to the Framework Programme FP7. It is open to all, however applications must come from consortia consisting of at least three 'legal entities' established in different EU Member States or Associated countries.

Description

Formally known as the Fuel Cell and Hydrogen Joint Technology Initiative, the FCH JU sits under the Strategic Energy Technology Plan (SET). The scope of the FCH JU is wide, from transport applications to stationary/portable power generation and hydrogen production and distribution. This initiative is targeted at speeding up the development of hydrogen-supply and fuel-cell technology with a focus on large scale commercialisation. The scheme covers both long-term & breakthrough technology projects as well as large-scale demonstration projects.

The FCH JU posts annual calls with a set budget on topics determined by the SET for research projects.

Application Information

Applications should be made in response to specific calls and should come from a consortium. Full details on how to apply can be viewed here:

<http://www.fch-ju.eu/content/how-participate-fch-ju-projects>

Contact Details

Call details and timings are found at the Research & Innovation Participant portal:

http://ec.europa.eu/research/participants/portal/page/fp7_calls

Useful Links

Website: <http://www.fch-ju.eu/>

Information about the SET plan can be found at:

http://ec.europa.eu/energy/technology/set_plan/set_plan_en.htm

To keep a watch for current calls and details of how to apply go to:

<http://cordis.europa.eu>

Competitiveness and Innovation Framework (CIP)

Minimum award: N/A

Maximum award: Varies by call, EU may fund up to 95% of project costs

Eligibility

Open to all businesses meeting the EU [definition](#) of an SME.

Description

Three programmes operate under the CIP banner:-

- The Entrepreneurship and Innovation Programme (EIP) providing access to finance via venture capital investment and loan guarantees.
- The Information Communication Technologies Policy Support Programme (ICT PSP) with an aim to develop a single, inclusive European information society and to encourage innovation through wider adoption and investment in ICT.
- The Intelligent Energy Europe Programme (IEE) with a focus on energy efficiency, new energy sources and energy diversification.

CIP is a vehicle for both access to finance and funds, with annual calls for proposals for energy efficiency and ICT projects.

Additional Information

The EIP is likely to be most relevant to SMEs in the automotive industry. EIP focuses on; providing access to funding through CIP financial instruments that target SMEs in different lifecycle phases; providing business services through “Enterprise Europe Network”; support for transnational networking in the innovation process; eco-innovation pilots and market replication projects.

CIP does not support research, it aims to support innovation related activities. For SMEs CIP provides free of charge assistance for intellectual property rights issues for EU-funded projects at <http://www.ipr-helpdesk.org/>

Application Information

CIP covers a range of activities and programmes, as such access to funds and finance can differ across the schemes.

Email entr-cip@ec.europa.eu for programme information and details on how to engage with the CIP programme. Call details and deadlines are found at: http://ec.europa.eu/cip/index_en.htm

Contact Details

The EIP is managed centrally through the email: entr-cip@ec.europa.eu.

The ICT UK National Contact Point for CIP is Peter Walters pwalters@tuvnel.com

The Intelligent Energy Europe Contact Point is Ms Helen Fairclough energie@enviros.com

Useful links

http://www.enterprise-europe-network.ec.europa.eu/index_en.htm

European Investment Fund (EIF) European Investment Bank (EIB)

Minimum award: N/A

Maximum award: varies by investment vehicle and project.

Eligibility

All SMEs but you will be competing for funds and preference is likely to be given to those organisations perceived to have higher growth potential.

Description

EIF is Europe's leading developer of risk financing for entrepreneurship and innovation. The EIF offers a range of financing solutions for SMEs through a range of intermediaries. Solutions include venture capital, loans, microfinance and guarantees. The EIF had two main statutory goals:

- promote the implementation of European Community policies, notably in the field of entrepreneurship, technology, innovation, growth, employment and regional development;
- generate an appropriate return for our shareholders, through a commercial pricing policy and a balance of fee and risk based income

The EIF doesn't lend directly to companies, rather it works via intermediaries

Application Information

Who you talk to depends on which initiative/fund you are interested in accessing, it's not exactly straightforward. This link lists some of the intermediaries by country <http://www.accesstofinance.eu> however we recommend you visit the EIF website for the latest intermediary information, you'll also find contacts at EIF who will be best placed to point you in the right direction.

European Clean Transport Facility (ECTF) European Investment Bank (EIB)

Minimum award: N/A

Maximum award: 75% of eligible RDI (Research, Development, Innovation) for emissions reduction and up to 50% of other project costs up to a maximum of €200m.

Eligibility

Companies of any size and ownership of both investment and sub-investment grade credit ratings (or equivalent) that are committed to an eligible investment programme in the European transport industry in the period 2009-2012. ECTF specifically covers all areas of the value chain in the transport industry including Tier 1 and Tier 2 supplier firms.

Description

An opportunity to access loans via the EIB which are targeted to either R&D activities aimed at new technologies to reduce emissions AND/OR upgrading production facilities, new tooling etc. that will help achieve emissions/fuel efficiency targets but will not lead to a net increase in capacity at the plant. The loan term is up to 10 years. The current allowance for the ECTF is €60m, running from 2009 to 2012.

Application Information

Applications should be made after consultation with the EIB. Please contact the EIB for all information and guidance on how to apply.

Individual Loan from EIB European Investment Bank (EIB)

Minimum award: N/A

Maximum award: 50% of project costs

Eligibility

Projects in most sectors are eligible for finance as long as they contribute to EU economic policy objectives. Public and private sector can apply for loans.

Description

Individual (direct) loans are provided for projects where the total cost exceeds €25m. Adequate security is required for the loan. You may be required to pay fees for legal services and project appraisal although the EIB does not normally charge commitment or non-utilisation fees.

If project total costs are below €25m then intermediated loans are available via participating UK banks.

Application Information

For projects in excess of €25m, loans may be requested directly from the EIB. There is not a set application form but the EIB expects to receive a comprehensive feasibility study. The content and layout of the submitted documents are the responsibility of the project promoter who may not be the loan borrower. Where the project promoter and the loan borrower are not the same then general information such as legal status, principle partners, shareholders and organisational structures are required for both. For loans below €25m you should contact participating UK financial institutions.

Full details can be found here: http://www.eib.org/attachments/application_documents_en.pdf

Risk Sharing Finance Scheme (RSFF) European Investment Bank (EIB) & European Commission

Minimum award: N/A

Maximum award: 50% of project costs. Projects can exceed €15m.

Eligibility

Open to small, medium, large enterprise, research centres and academia.

Description

The EIB and EC have both contributed to create this finance facility with up to €2bn available until 2013. It's a debt financing facility for research, technology development, demonstration projects and innovation investment. The facility has been put in place to finance projects with a higher risk factor than the usual EIB loan profile. Financing is limited to 50% of the project costs. Finance may be made available directly to the organisation as corporate debt financing, project financing or mezzanine financing or through an intermediary as lines of credit or guarantees.

Application Information

For projects over €15m then application should be made directly to the EIB at either their Head Office in Luxembourg or at their London Office.

For smaller projects the EIB is working with a number of intermediaries, details of which are listed below.

As with all loans, a clear business case will be required and the EIB will investigate to satisfy there is an ability to repay the loan

Joint European Resources for Micro to Medium Enterprises (JEREMIE) European Investment Bank (EIB) & European Commission

Minimum award: N/A
Maximum award: N/A

Eligibility

Available to SMEs only.

Description

Contributions from the European Regional Development Fund (ERDF) are allocated to loan, guarantee or venture capital funds to invest in enterprises. These investments can take the form of equity, loans and/or guarantees. Returns from investments are reinvested in enterprises. In this way, a pool of funds can be re-used several times, recycling public funds, leveraging capital and increasing the sustainability and the impact of public resources allocated to SMEs.

Alternatively, managing authorities can decide to channel resources from the programme using Holding Funds (HFs) which are set up to invest in several investment funds. This is not compulsory, but does offer the advantage of enabling managing authorities to delegate some of the tasks required to implement JEREMIE to expert professionals.

Application Information

Applications need to be made through Financial Intermediaries that are funded by this initiative.

Contact Information

European Investment Fund (JEREMIE Team)

PATENTSCOPE

World Intellectual Property Organisation (WIPO)

Minimum award: N/A
Maximum award: N/A

Eligibility

Open to all, PATENTSCOPE is a free to access and free to use.

Description

PATENTSCOPE is an international database of 18,676,085 patent documents, including 2,184,599 published international patent applications (PCT). The database has a free text search function that works across all data entries and can be refined to individual countries.

Additional Information

PATENTSCOPE also allows for searches by patent number and can translate search terms into other languages.

Application Information

There is no application involved. Simply visit the website to use the tool.

Contact Details

There are no direct contact details to share. For support, there is a forum that tackles issues encountered when using PATENTSCOPE, available here:

IPC Green Inventory World Intellectual Property Organisation (WIPO)

Minimum award: N/A
Maximum award: N/A

Eligibility

Open to all, the IPC Green Inventory is a free to access and free to use.

Description

The “IPC Green Inventory” was developed by the IPC Committee of Experts in order to facilitate searches for patent information relating to so-called Environmentally Sound Technologies (ESTs), as listed by the United Nations Framework Convention on Climate Change (UNFCCC). ESTs are currently scattered widely across the IPC in numerous technical fields. The Inventory attempts to collect all ESTs in one place, although it should be noted that the Inventory does not purport to be fully exhaustive in its coverage.

The IPC Green Inventory groups patents into a number of topics pertinent to the automotive industry. These include biofuels, fuel cells and greener vehicle technologies.

Additional Information

Each topic can be expanded to show both details of the international language independent code used to classify patents as well as links to PATENTSCOPE to show relevant patent entries. The links in the PATENTSCOPE column allow the user to automatically search and display all international patent applications available through PATENTSCOPE which are classified in the relevant IPC place.

Application Information

There is no application involved. Simply visit the website to use the tool.

Disruptive technologies in low carbon vehicles Technology Strategy Board

Minimum reward: N/A

Maximum reward: £750,000

Eligibility

Projects must be collaborative and business-led. This competition is primarily aimed at small and medium-sized enterprises but does not exclude larger organisations bringing forward game changing ideas. Companies working outside the automotive sector that can bring technical expertise and knowledge to a consortium are particularly welcome.

Description

The Technology Strategy Board is to invest up to £10m to support the further development of innovative technologies with the potential to transform the automotive industry. We are seeking highly innovative, vehicle-centric, business-led, proof-of-concept projects to become part of our Low Carbon Vehicles Innovation Platform Integrated Delivery Programme. We are targeting disruptive technology and research that challenge current conventions from a position of intellectual strength and will look to support projects that explore new boundaries or adapt existing novel technologies for deployment into new fields.

Application Information

This two-stage competition opens on 14 January 2013. The deadline for registration is at noon on 13 February 2013 and the deadline for expressions of interest is at noon on 20 February 2013. The second stage for invited applications opens on 18 March 2013 and the deadline for invited applications is at noon on 8 May 2013. A briefing event will be held on 22 January 2013, and a networking event to facilitate consortia-building for this competition will be held on 27 November 2012.

Contact Information

Email: competitions@innovateuk.org

Phone number: 0300 321 4357

Collaborative Research & Development Projects Technology Strategy Board

Minimum award: N/A
Maximum award: 75% of research costs

Eligibility

Open to UK companies and research organisations, however applications must come from consortia comprising at least two collaborators one of which must come from industry.

Description

Throughout the year the TSB put out competition calls for collaborative research projects across a range of industries. Applications must address the project detail and expected impacts listed by the TSB. This is a consortium based scheme, you must build a project plan with at least one other UK organisation and one partner must be from industry.

Full details are available here:

<http://www.innovateuk.org/deliveringinnovation/collaborativeresearchanddevelopment.ashx>

Application Information

Applications must be made in response to specific competition calls made by the TSB. Details of all current calls can be found at <http://www.innovateuk.org/competitions.ashx>

Further information on each call should be sourced directly from the TSB where you will also find advice for making applications.

Contact Details

Different competitions have various contacts. Follow the link below to find the ideal contact for each specific competition call.

Data Exploration

Minimum award

Maximum award up to 50% funding of project cost (60% for SMEs)

Eligibility

Proposals must be collaborative and business-led and include at least one small or medium-sized enterprise (SME). It is expected to fund mainly industrial research projects in which a business partner will generally attract up to 50% public funding for their project costs (60% for SMEs). Projects would range in size from total costs of £100k to £500k, although it could be considered projects outside this range, and they should last between six and 24 months.

Description

The Technology Strategy Board is to invest up to £4.5m in collaborative research and development that addresses the technical challenges and business opportunities presented by the huge growth in data.

This competition focuses on innovations in the data exploration techniques of analytics, modelling and visualisation to generate new insight or value from large amounts of complex data.

Application Information

This competition opens for applicants on 6 January 2014. The deadline for registration is at noon on 26 February 2014 and the deadline for applications is at noon on 5 March 2014.

Applications are assessed on individual merit by an independent panel of experts. For more information and all the documents you need to read before you apply, including the Guidance for Applicants, go to the web page for this competition at www.innovateuk.org under Funding & Support > Funding competitions.

SMART: Grant for Research and Development Scheme Technology Strategy Board

Minimum award: N/A

Maximum award: Depends on the type of project (see below) from £25k to £250k for 'matched funded' projects. Companies must source additional finance to match the money invested by the TSB.

Eligibility

This programme is open to SMEs in any sector. To be eligible you must meet the definition of an SME as prescribed by the EU. You can find full SME definition details at:

http://ec.europa.eu/enterprise/policies/sme/facts-figures-analysis/sme-definition/index_en.htm

Description

This is a great opportunity for pre start-ups, start-ups and SMEs to access funding for projects as individual companies can apply for the grants. However, this is still a matched fund, so alternative sources of funding for part of the project are still required. This grant replaces the old regional development agency Grant for R&D Scheme.

Three types of projects are supported:

Proof of Market (up to £25,000 grant)

A grant targeted to assist companies in assessing commercial viability through market research, market testing, intellectual property position and commercialisation planning such as assessing costs and timescales. Projects should last no longer than 9 months and funding can provide up to 60% of total project costs.

Proof of Concept (up to £100,000 grant)

This grant focuses on technical feasibility studies and assessing the commercial potential of new technologies, products or processes. Grants of up to £100k can be used for initial feasibility studies, basic prototyping, specialist testing, and intellectual property protection. Projects can last up to 18 months and funding can provide up to 60% of total project costs.

Development of Prototype (up to £250,000 grant)

Up to £250k is available for a project of up to two years to develop a technologically innovative product, service or process. Funding will cover a range of activities including small demonstrators, IP protection, market testing, marketing strategies, trials and testing, product design work and identifying routes to market.

The round 6 opens on 30 January 2014 and closes on 27 March 2014.

Application Information

Please visit the TSB website for latest information. The TSB may run themed competitions to direct the R&D grant to priority investment areas www.innovateuk.org.

Email: support@innovateuk.org Telephone: 0300 321 4357

Make it lighter, with less

Minimum award N/A

Maximum award up to 50% public funding of the project costs (60% for SMEs)

Eligibility

This competition is designed to enable companies to develop new business opportunities through innovations in manufacturing technology, advanced materials and material re-use. It aims to stimulate industrial research, generally in the range of Technology Readiness Levels 3 to 6, as defined in our [High Value Manufacturing Strategy 2012-2015](#). Further details could be found [here](#).

Description

The Technology Strategy Board and the **Engineering and Physical Sciences Research Council (EPSRC)** are to invest up to £8.5m in collaborative R&D projects to develop advanced materials and manufacturing technologies which deliver lighter, better-performing and more material-efficient structures and products across a broad range of industrial sectors and global markets.

This competition aims to strengthen the UK's collective expertise in lightweighting and resource-efficient manufacturing, and to develop a more robust and competitive supply base.

Application Information

Each project consortium must include a minimum of three companies, at least one of which must be involved in the manufacturing supply chain, either currently or potentially in future. The consortium must include representatives of at least two different market or industry sectors.

This is a two-stage competition that opens for applicants on 3 March 2014.

Stage 1 – Applicants submit an expression of interest, which is assessed.

Stage 2 – We invite selected applicants to submit an application.

All applicants must first register via our website by noon on 9 April 2014. The deadline for expressions of interest is noon on 16 April 2014. The Stage 2 briefing is on 14 May 2014, and the deadline for invited applications is noon on 25 June 2014. Applicants will be advised of the results of their applications in early August 2014, and projects should start between October and December 2014.

Towards Zero Prototyping Technology Strategy Board

Minimum award £100,000
Maximum award £1m

Eligibility

Projects must be collaborative and business-led. Project partners can include research organisations and businesses of any size. Projects should last between one and two years with project sizes between £100k and £1m.

Description

The Technology Strategy Board and the Engineering and Physical Sciences Research Council (EPSRC) are to invest up to £5.5m in collaborative R&D that develops and extends the use of novel modelling and simulation techniques, enabling product and process designers and manufacturers to reduce the need for physical prototypes.

The aim is to help UK manufacturers to improve their design processes, speeding up the design cycle, reducing costs and creating better designs, thereby improving the UK's competitiveness.

Application Information

Levels of funding depend upon the category of research, and the type of partner in the consortia involved. For example, a business would attract 50% public funding of project costs for industrial research (60% for SMEs).

This is a two-stage competition which closed on 4 December 2013. The second stage deadline for invited applications is at noon on 12 February 2014.

Niche Vehicle CR&D Programme

Minimum award: Call specific
Maximum award: Call specific

Eligibility

Open to independent niche vehicle manufacturers, system suppliers, specialist automotive technology companies and Universities aiming to exploit innovative niche vehicle technologies and develop more successful routes to market. Free to join.

Description

Backed by the Technology Strategy Board and the Office for Low Emission Vehicles, the Niche Vehicle Network promotes and stimulates R&D collaboration by bringing together independent vehicle manufacturers, system suppliers, automotive technology companies and HEIs, to collaborate on the innovative application of technologies in low-volume vehicle production. Since its inception, the Network has been a catalyst for over 100 different business collaborations and has assisted the development of over 10 prototype vehicles and 3 process improvement projects.

Membership of the Niche Vehicle Network is free and provides members with access to a wide range of resources, including previous R&D project reports, a niche vehicle design guide and admission to an online database of suppliers who specialise within the niche vehicle sector.

The Network also provides grant funding for niche vehicle manufacturers, suppliers and technology organisations who wish to collaborate on innovative, industry-led projects focussing on developing and demonstrating vehicle or system level road-vehicle technology in the following categories:

- Improved Fuel Efficiency & Carbon Reduction
- Weight Reduction & Recyclability

Application Process

Small Business Research Initiative (SBRI) Technology Strategy Board (TSB)

Min award: N/A

Max award: Phase 1 up to £100k and Phase 2 up to £1m.

It is worth noting that under SBRI you can receive the full cost for demonstrating the feasibility of your technology. This is unusual for projects receiving funding where 'matched' funding is a more normal approach.

Eligibility

SBRI calls are open to all to apply although it is expected that SBRI will be of most benefit to SMEs. Universities and pre-start-up companies can apply. Funds will only be awarded to legal entities that can prove a route to market for the technology.

Description

SBRI is an innovative approach for government departments to access solutions for specific issues. Project calls detail problems which it is hoped to be solved via a SBRI project. Any government department can list a project, so this is not a transport specific initiative.

There are some benefits to finding a relevant SBRI project to apply for:

- You'll receive funding to cover the full costs of demonstrating the feasibility of your technology.
- IP is retained by the company.
- Working with a government department means you have a customer ready and waiting for your development.
- Projects do not have to be run as collaborative initiatives, an individual company can apply.

At Budget 2013, Government announced it will expand the SBRI budget from £40m to over £100m in 2013-14, rising to over £200m in 2014-2015.

Application Information

Applications will vary by department and call and may be handled directly by the government department or via the TSB. It is best to follow the link below entitled 'competition list' to view all open calls and follow the directions for applications against each call.

<https://www.innovateuk.org/funding-competitions>

Innovation Networks (West Midlands)

Minimum award £10,000
Maximum award £10,000

Eligibility

This funding is available to small or medium sized enterprises (SMEs) based in the West Midlands who are working in an “Innovation Network” with at least 2 other regional SMEs on the development of a new product, process or service.

Description

Innovation Network scheme offers £10,000 grants that are quick and easy to apply for the help to cover the costs associated with the development of the new product, process or service.

Additional Information

Innovation Networks offers two types of grants:

1) Revenue grants

Grants of £10,000 are available to assist with product development costs such as parts and materials, consultancy fees and prototyping.

2) Capital grants

Grants of £10,000 are available for expenditure on equipment, machinery or tooling. The grants are awarded as a contribution towards projects with a minimum planned expenditure of £22,500.

A company will only be eligible for one grant.

Application Information

To apply for funding companies should have their ‘Innovation Network’ of a minimum of three West Midland SME companies in place. These may be the suppliers that you are working with but could also be other partners such as consultants, marketing companies and potential end users.

Application process is explained here:

Knowledge Transfer Networks Technology Strategy Board (TSB)

Minimum award: N/A
Maximum award: N/A

Eligibility

Open to all organisations and individuals. It is free to join.

Description

Knowledge Transfer Networks (KTNs) are a Technology Strategy Board (TSB) initiative that aims to improve the speed of knowledge exchange across and between sectors. KTNs are a mix of industry focused communities, such as the Surface Transport KTN or a technology focus such as the Materials KTN. Currently there are approximately 50,000 members of 16 KTNs.

KTNs offer an opportunity to access information, to network and to contribute towards the collective knowledge of the network. Each KTN has an industry led steering committee and a programme of activities including events, conferences and newsletters. Belonging to a KTN can help you engage with individuals from other businesses and research communities.

For the full description visit the website:

<http://www.innovateuk.org/deliveringinnovation/knowledgetransfernetworks.ashx>

KTNs are now hosted on _connect, a free to join networking platform:

<https://connect.innovateuk.org/web/guest/home>

An overview of the Transport KTN is available here:

<https://connect.innovateuk.org/web/transportktn/overview>

Application Information

You simply need to register on line to join. You'll find the full list of KTNs to sign up to at

<https://connect.innovateuk.org/web/guest/networks>

You can be a member of as many KTNs as you feel would be beneficial.

Contact Details

The Director of the Surface Transport KTN is Neil Ridley who can be contacted at

neil.ridley@transportktn.org

<https://ktn.innovateuk.org>

Knowledge Transfer Partnerships Technology Strategy Board (TSB)

Minimum award: N/A

Maximum award: An SME may receive up to 2/3rds of the project costs although grant levels are variable.

Eligibility

Open to any business (public & private of any size) that has a requirement for a knowledge partner. The scheme can apply to short-term injections of knowledge expertise or a longer term placement with partnerships running from 10 weeks to 3 years.

Description

Knowledge Transfer Partnerships (KTPs) are a part-funded government scheme supported by BIS, TSB and the EU. A Partnership is formed between your business and an academic institution enabling access to the skills and expertise within the institution to help your business grow. Participation in Knowledge Transfer Partnerships provides you with access to experts to help develop innovative solutions for your business. While business performance varies across the range of projects according to information collated from previous projects the business benefits you can expect include:

- An increase of over £220,000 in annual pre-tax profits
- The creation of three new jobs
- An increase in skills of existing staff

Each Partnership is only partially funded. An SME can expect to face costs of approximately £20,000 per annum.

Full background is available here:

<http://www.ktponline.org.uk/strategy>

Application information

Not all projects are suitable for a KTP. There is a clear step-by-step process online that takes you through assessing project suitability, finding your potential Knowledge Partner and completing the on-line application form, all found at: <http://www.ktponline.org.uk/ktp-starting-a-knowledge-transfer-partnership>

Advice is available from the KTP helpline where advisors can help you with all aspects of the scheme.

Manufacturing Competencies Technology Strategy Board (TSB)

Minimum award: NA
Maximum award: £25,000

Eligibility

The competition is open to small and micro companies only (no more than 50 employees), working either alone or in collaboration with one partner. Projects can last up to four months and are eligible for grants of up to £25,000. Total project costs must not exceed £33,000. The single company or partners must spend most of the money in house.

Description

The Technology Strategy Board is to invest up to £2m in feasibility studies to stimulate innovation by small and micro business in a broad range of manufacturing competences. By 'competences' TSB mean the methods, equipments and expertise that can be developed as a leading capability in one market sector or application and have real potential to be applied successfully across other sectors or applications as well.

TSB are seeking projects across the whole manufacturing lifecycle, from design and engineering through to process development, manufacture, service delivery and re-manufacture/re-use, including innovation in supply/distribution chains, risk management and business models. This competition encourages small companies to innovate in a number of 'competence areas' which we believe have the potential to bring strong growth to UK manufacturing businesses.

Application information

This is a single-stage competition. It opens on 24 September 2012 and the deadline for receipt of applications is at noon on 7 November 2012. Successful applicant should plan to start the project by 4 March 2013. An event for successful applicants will be held shortly after project completion (July 2013) for dissemination of results, to encourage collaboration and to help bring projects to market.

Advanced Manufacturing Supply Chain Initiative (AMSCI)

Minimum award: £2million
Maximum award: N/A

Eligibility

Eligible innovative projects which are seeking to create world-class excellence in supply chain. Full list of eligibility criteria could be found on page 3 of the following document
http://www.innovateuk.org/assets/innovate_uk/amsci_competition_brief_february_2013.pdf

Description

Advanced Manufacturing Supply Chain Initiative made £125 million available through the first two rounds of the scheme to improve global competitiveness of UK advanced manufacturing supply chains. There was a high demand from participating companies - over 70 bids which created or safeguarded over 18,700 jobs. The success of first two rounds of the AMSCI encouraged the creation of further two rounds of the initiative. A further £120 million were announced in the 2012 Autumn Statement. This will support research and development, skills and capital investment to ensure high standards of UK supply chain and locate new suppliers in the UK.

Funding will be available for the following areas:

- the purchase of capital equipment
- R&D activity which improves manufacturing equipment, product development, systems or processes
- specific training and skills development to support the project.

Companies can now bid for a share of £100 million from a government scheme to help them strengthen their domestic supply chains and help bring manufacturing back to the UK.

Application Information

Full competition details and information can be found on the [AMSCI 2014 website](#).

Advanced Propulsion Centre: Creating UK capability in low-carbon automotive technologies (competition 2)

Minimum award: N/A
Maximum award: N/A

Eligibility

To be eligible for this competition, projects must primarily fall under either the industrial research or experimental development category. A full definition of these categories is available in the [guidance for applicants](#) section of the website.

Description

The Advanced Propulsion Centre (APC), in partnership with the Department for Business, Innovation and Skills (BIS) and the Technology Strategy Board, announced the winners of the first APC competition (APC1) in April 2014 and is now to invest an additional £75m in collaborative R&D projects in the field of low-carbon propulsion technologies.

The APC is the centrepiece of the new joint industry and government strategy for the automotive sector and was launched to help develop, commercialise and enable the manufacture of advanced propulsion technologies in the UK.

Project work packages that are classified as industrial research, can have a business partner attracting a maximum of 50% public funding for their project costs (60% for SMEs), or for work packages in experimental development, the business partner can attract a maximum of 25% funding (35% for a medium-sized company and 45% for small enterprises).

Application Information

This competition opens on 8 May 2014. The deadline for registration is at noon on 25 June 2014 and the deadline for applications is at noon on 2 July 2014.

Contact Details

Please email the Technology Strategy Board at competitions@innovateuk.org prior to submitting your application, in order to review your eligibility or call support number on 0300 321 4357.

Employer Ownership Fund - Automotive supply chain skills

Minimum award: } (grant funding of 50% for courses which deliver skills which are
Maximum award: } transferable and 25% for courses which are for company specific training)

Eligibility

The fund is open to business in the automotive supply chain where:

- The business is based in England
- A significant part of the business links to Tier 1/OEM efficiency and growth
- The business is involved in the production of components, tools or other production line equipment.
- Principal exclusions
- Supply of raw materials
- General business services.

Description

The overall purpose of the fund is to support employers overcoming barriers to investment in strategically important areas, deliver grant funding quickly and meet the terms of the General Block Exemption Regulations for Training Aid.

Total funding available is £20m for automotive comprising of two calls of £10m (first underway). Projects can be over 3 years 2014 – 15 – 2016 – 17.

Application Information

- Applications can be made from 6 May to 25 July
- The system opens at 10.00 am on Monday and closes at 12.00 pm on Friday throughout this period.
- Applications will be assessed as they are received.
- Applicants will be notified as soon as their bid has been assessed –within 5 weeks where possible.
- Terms of the offer are set out in the Grant Offer Letter.

The Centre for Resource Efficient Manufacturing Systems (REMS)

Minimum award: N/A

Maximum award: N/A

Eligibility

Please contact the centre for more information.

Description

The Centre for Resource Efficient Manufacturing Systems (REMS) will research and investigate manufacturing processes and supply chains to help companies improve production processes by reducing emissions, saving time, reducing cost and minimising the resources they use.

Application Information

Please contact the centre for more information.

Express and Star Green Shoots Fund (Black Country)

Minimum award 10,000
Maximum award 50,000

Eligibility

Eligible business should be an SME operating in the Black Country (identified through Business Rates being paid to Dudley MBC, Sandwell MBC, Walsall MBC or Wolverhampton MBC). Full criteria could be found [here](#).

Description

The Express and Star Green Shoots Fund aims to help small to medium sized enterprises (SMEs) in the Black Country to create new jobs and promote growth in the region.

Businesses will be able to supplement their own investment by applying for an award ranging from £10,000 to £50,000 to support capital investment projects, with the money coming from the Government's Regional Growth Fund, which create substantial new employment and safeguard existing jobs.

Application Information

Projects must be completed by January 2015. Support will be provided in the form of coaching and mentoring for successful businesses to ensure the best possible return on investment.

As a first step applicants should complete expression of interest form. Further information is [here](#).

Contact Details

For more information about the Green Shoots Fund, please contact Martin Nicholas, Green Shoots Programme Manager:
Email: martin.nicholas@wlv.ac.uk

Corridor Growth Fund (Manchester)

Minimum award N/A

Maximum award any one applicant can receive during the three-year period is around £169,500

Eligibility

This research and development related employment grant scheme is to operate within the science related facilities based in the knowledge economy district of Manchester known as 'The Corridor'. Full eligibility criteria could be found [here](#).

Description

The £2 million Corridor Growth Fund, supported by the Government's Regional Growth Fund, will provide grant funding to qualifying applicants to help underpin the private sector-led growth of the knowledge economy in Manchester The Corridor district. The Scheme, aimed predominantly at small and medium-sized enterprises, will operate from 1 April 2013 until 31 March 2015 and is expected to support the creation of at least 100 full-time jobs.

Application Information

Full details on application process could be found [here](#) or to request a form please email to corridorgrowthfund@manchester.gov.uk.

Contact Details

Please direct all queries to corridorgrowthfund@manchester.gov.uk

Growing Priority Sectors (Black Country)

Minimum award £50k
Maximum award £1m

Eligibility

Businesses wishing to apply for the fund should be located in one of the four Black Country Authorities of Dudley, Sandwell, Walsall or Wolverhampton. More information could be found [here](#).

Description

The Black Country LEP and partners successfully bid for over £13 million of RGF. Grant funding of between £50,000 to £1 million is available. Growing Priority Sectors is a competition fund, administered by Sandwell MBC. In order to maximise the benefits of this new round of funding, and to ensure that the programme offers good value for money, projects must ensure:

- The cost per job is £15,000 or less
- The grant request does not exceed 25% of total project costs.

Application Information

There is a two stage application process, firstly companies must complete an expression of interest form, this will be assessed and if approved, applicants will be asked to complete a full application. Applicants are encouraged to get their expressions of interest in as early as possible (this will allow more time to complete the full application). There are two application processes: Fast Track (4 weeks) and Standard (8 weeks). Further information could be found [here](#).

West Midlands and Liverpool City Region Programme

Minimum award: £100,000

Maximum award: N/A

Eligibility

Open to all SMEs and sole traders of all sectors in the four LEP areas of Black Country, Coventry and Warwickshire, Greater Birmingham and Solihull and Liverpool City Region.

Description

The West Midlands and Liverpool City Region Programme is part of a wider Advanced Manufacturing Supply Chain Initiative. The Programme builds upon a previously successful RGF bid put forward by a consortium of four Local Enterprise Partnerships and Birmingham City Council for funding from the Government's Regional Growth Fund. The objective of this Initiative is to provide a flexible package of funding to help both new and existing supply chains develop, grow and achieve world class standards, whilst encouraging major new suppliers to set-up and manufacture across England. At the centre of the Programme is a £19m fund to support projects which deliver economic growth and generate and/or safeguard jobs. The fund will adopt a flexible approach to funding (loans and grants) focusing on the provision of funding towards the purchase of capital equipment and funding working capital requirements as well as funding the complementary requirement of R&D and skills development.

Application Process

To enter into this Programme you will need to initially complete an Expression of Interest Form for each project and then, if successful, at that stage complete an Application Form, these forms can be obtained from www.financebirmingham.com/amsci

The West Midlands and Liverpool City Region Programme will operate on a rolling Application basis, subject to the availability of funding. The assessment process will be aligned to the monthly meetings of the Investment Board.

Black Country Business Property Investment Programme (Black Country)

Minimum award N/A

Maximum award up to 35% of eligible development costs

Eligibility

Eligible SMEs based in Black Country.

Description

The BCBPIP is a European Regional Development Fund (ERDF) Programme which aims specifically to support small to medium sized (SME) companies by providing viability gap funding for infrastructure provision – whether this is through new or refurbished business premises (comprising B1, B2 and B8 uses only) – [view use classes](#).

Application Information

Grant funding will be awarded following a two stage process where applicants will be competing for resources at both stages:

- Expression of Interest stage (EOI) – this stage is looking for eligible projects which are not only deliverable within the Programme parameters and timescales but also provide value for money
- Detailed full application including a business plan – Applicants invited to submit a full application will need to provide further details about their proposal including (but not limited to) detailed cost plans. Each project will be subject to a full and detailed technical appraisal of their proposal. This will be carried out by an independent qualified technical appraiser who will determine the level of grant funding to each project.

If you are interested in applying for funding from this Programme please view the 'Expression of Interest' form. For further information please view the [EOI guidance notes \(PDF 178KB\)](#)

Business Innovation Programme

Minimum award £10,000
Maximum award £30,000

Eligibility

The grant scheme is open to SME businesses within the West Midlands area which have been trading for 6 months or more and are ready to undertake investment in innovative production processes.

Description

The Business Innovation Programme (BIP) is a £8.7 million package of support, funded by European Regional Development Fund (ERDF), aimed to stimulate innovation within SMEs to encourage and enable existing businesses to invest for the future, to lever private sector investment, create new and safeguard existing jobs.

Application Information

Applicants are encouraged to incorporate a combination of one or more of the following:-

- capital expenditure
- new product development
- new marketing development
- business innovation mentoring

An application form is available at www.birmingham.gov.uk/BIP which will be processed within 6 weeks. The scheme is open until June 2015.

The application only should be emailed to suzanne.dottin-payne@birmingham.gov.uk.

Black Country Reinvestment Society (BCRS)

Minimum award £10k
Maximum award £100k

Eligibility

Loans are offered to businesses making a positive contribution to the social, environmental or economic well-being of the West Midlands. We lend to most market sectors including construction, engineering, IT services, manufacturing, service providers and wholesalers.

Description

The loan fund has been especially designed to meet the needs of West Midland's based businesses that are unable to get loans from traditional sources such as banks. We understand that getting business finance can sometimes be a problem. Lack of track record, unreasonable security arrangements, past financial problems or simply not meeting conventional credit scoring methods may be hindering the process.

A BCRS loan can be used for a wide range of projects including working capital, purchasing equipment, start-ups, recruitment and marketing.

Application Information

Interested companies as a first should complete the enquiry [form](#). This will be sent to the BCRS administration team who will look at the information provided and direct your enquiry to the relevant Business Development Manager.

Resource Efficiency Technology Strategy Board (TSB)

Minimum reward: NA
Maximum reward: £25,000

Eligibility

The competition is open to all UK companies. Projects must be business-led and may be collaborative or led by a single company. All must involve a distinctive design contribution. In a collaborative project, we would expect to see the new design expertise brought in by one or more partners. The main deliverable for each feasibility project will be a report summarising the approach, quantifying the benefits of the new design and outlining the next steps.

Description

The Technology Strategy Board is to invest up to £1.25m in feasibility studies into the re-design of products, components and systems to retain material within the economy over several cycles of use – 'closing the loop'. The new designs should lead to products with a lower environmental impact and/or that are less dependent on the use of strategic materials.

TSB have identified 'closing the loop' and the move towards the 'circular economy' as a significant opportunity for UK business to contribute towards a resource efficient and low-carbon economy, to reduce their costs and supply risks, and to generate value.

Application information

The first round for receiving applications has been closed on 12 December 2012. The second opens on 11 February 2013. The deadline for registration is noon 20 March 2013 and the deadline for applications is noon 27 March 2013. Grants will not exceed £25k and for large enterprises, will be no more than 65% of their project costs, and, for small and medium-sized enterprises, no more than 75% of their project costs.

Engineering and Physical Sciences Research Council (EPSRC) Research Funding

Minimum award: N/A
Maximum award: N/A

Eligibility

The EPSRC has an academic focus with many of their funds targeted at post graduate students and academia. However, it is also useful for industry as while you may not be able to access funds, you can work with research projects, the outcome of which may significantly support your business development. Research projects need to fall under the 'portfolio' of interest for the EPSRC. Projects are peer reviewed and to gain funding, need to show importance on both a national and international level.

Description

The EPSRC is the main UK government agency for funding research and training in engineering and the physical sciences. Over £850m is invested a year in projects across a number of sectors. EPSRC's mission is to "Promote and support, by any means, high quality basic, strategic and applied research and related postgraduate training in engineering and the physical sciences."

The website lists research projects currently being funded with links to the main contact for each project. See Useful Links for route to list.

Application Information

There are a number of schemes listed on the site. Latest information can be found at: <http://www.epsrc.ac.uk/funding/routes/Pages/az.aspx>

Local Enterprise Partnerships (LEPs)

Minimum award: N/A
Maximum award: N/A

Eligibility

LEPs are open to engagement and discussion from all businesses within their area. Further involvement is dependent on each LEP. Specific criteria may exist for individual schemes or programs.

Description

Local Enterprise Partnerships (LEPs) are joint ventures between local businesses and local governments (upper tier local authorities such as County Councils). Their focus is on the economic growth and development of their area. They look at all aspects of development, from infrastructure, to employment, to enterprise. LEPs define their own local agenda in terms of strategy for business, enterprise and support. Priorities will differ between LEPs so local ownership and governance should result in more businesses being able to define the direction of economic growth in their area. This is part of the UK Government's plan for de-centralised local government, which hopes to result in national economic growth.

Local Enterprise Partnerships have taken over the role of Regional Development Agencies (RDAs). RDAs broke up England into 9 large regions, now replaced by 38 LEPs, which individually cover smaller areas but with some overlap between. The RDAs had access to substantial funds from both the EU and UK governments (One North East had a budget of £580million for the period 2008-2012 for their 'helping business' programme). As the creation of LEPs was a result of Government cutbacks in public spending, the level of funding available to LEPs is substantially smaller. So far the government has only made £9million of combined funding available to LEPs in the form of the LEP Start Up Fund and the LEP Capacity fund, both of which were competitive calls. LEPs will however be able to apply for the Regional Growth Fund both directly and in support of constituent businesses' applications. LEPs will receive funding from the European Regional Development Fund.

At Chancellor's Spending review it was confirmed that LEPs will bid for Single Local Growth Fund (SLGF) with Growth Deals. At least £2bn funds per annum to 2021 were confirmed with overall pot of at least £20billion. It will also include a further commitment of £5 billion of transport funding in the SLGF from 2016/17 to 2020/21. LEPs will hold responsibility for how £5.3bn of EU Structural and Investment Funds will be spent.

Application Information

Application for funding, finance and support available to your LEP is managed directly by them. Programs available will vary between LEPs. For the full list of LEPs across England, see below:
<http://www.lepnetwork.org.uk/the-lep-network.html>

Growing Places Fund

Minimum award N/A
Maximum award N/A

Eligibility

The funding criteria and application process for each LEP differs therefore applicants are advised to check details with their local LEP. Details of the amounts awarded to each LEP can be found here <https://www.gov.uk/government/news/500m-fund-to-unlock-the-potential-for-economic-growth>

Description

The Growing Places Fund provides £500 million to enable the development of local funds to address infrastructure constraints, promoting economic growth and the delivery of jobs and houses. Types of projects could include:

- early development of strategic link roads and access works to unlock major mixed-use developments, enabling the delivery of homes and commercial space – leading to the creation of jobs and securing private investment;
- provision of flood storage capacity to enable development of homes, employment space and retail space; and
- works to improve local connectivity and reduce congestion through interventions such as extending dual carriageways, enabling developments to be taken forward sustainably.

Application Information

Businesses are invited to apply for funding to support their business plans. Further application details could be obtained from local LEP.

Contact Details

The Growing Places Fund is managed locally by Local Enterprise Partnerships (LEPs).

Enterprise Zones

Minimum award: N/A
Maximum award: N/A

Eligibility

Open to all businesses within an Enterprise Zone

Description

Enterprise Zones are well defined geographical areas that afford businesses within them certain financial and regulatory benefits. There are 22 currently around the UK. Each one is managed by the Local Enterprise Partnership (LEP) that it falls within. As there are 38 LEPs around the UK, not every LEP will have an enterprise zone within it. Enterprise zones vary in size but are on average in the region of 100 hectares (1000m x 1000m), allowing for multiple businesses to benefit from them.

The role of the Enterprise Zone is to promote economic growth in the area, using the benefits they offer to pull new business in and support those already established. Each enterprise zone has its own sectors of focus.

Benefits for businesses include a discount on business rates (up to the value of £275,000 per business over a five year period) and simplified planning procedures to support growth and development. Business rates growth over a period of at least 25 years will be retained by the local area allowing for local reinvestment. The UK Government has also pledged to support the roll out of superfast broadband in all the zones with a regulatory environment that will facilitate this and if needs be, public funding. In some enterprise zones, LEPs will be able to offer enterprise zones enhanced capital allowances for plant and machinery. Tax increment finance (borrowing against future business rate increases) and UKTI support for inward investment or trade opportunities in the zone will also be made available to enterprise zones. The zones are one of the ways LEPs can help ensure economic decisions are more business-led and have the maximum possible impact on economic growth in the area.

The Chancellor's Spending Review confirmed that additional £59 million will be awarded to successful Enterprise Zones to fund the local infrastructure projects. Government will also make available £100m in 2014-15 to Zones that can identify sites with high growth potential.

Application information

Application involves communication with your LEP to ascertain exactly what benefits are available in your area. As enterprise zones' benefits are only available to its tenants, you will need to be based within an enterprise zone to apply. Each enterprise zone has its own regulations.

Tooling Funding Programme

Minimum award: £50k
Maximum award: £1m

Eligibility

Applicants for funding for the manufacturer of tooling will need to show the following:

- That they have had difficulty in securing the required level of funding for the manufacturer of tooling
- That the final manufacture of the tooling and component will be located in England
- That new jobs will be created and/or safeguarded by the toolmaker and component manufacturer
- That a firm order for the tooling will originate from an original equipment manufacturer, a tier 1 supplier or from further along the supply chain with payment due upon satisfactory completion of the tooling

Description

Business Minister Michael Fallon has announced a new £24 million government fund to help component manufacturers design, develop and manufacture new tooling at the SMMTs Meet the Buyer event in London. The scheme is open to manufacturing companies seeking a loan of £50,000 to £1 million, although funding requests in excess of this will be considered.

Application Information

Applicants wishing to make an application for funding should submit an Expression of Interest form which will be followed up with a detailed discussion with a member of the Programme Team.

National Loan Guarantee Scheme

Minimum award: N/A
Maximum award: N/A

Eligibility

Loans and overdrafts through the scheme will be available to UK companies with a turnover no larger than £50m. Companies cannot be in financial difficulty.

Description

The scheme will provide loans and overdrafts to SMEs that may be limited in their borrowing capabilities, where banks may think it too risky to lend to them. £40b has been set aside for the programme which will be made available through a company's bank, in the same way the European Investment Bank's loans for SMEs are. Loans are offered at 1% less than the standard business rate.

The following banks can provide terms loans, hire purchase agreements and lease agreements under the scheme:

- Aldermore
- Barclays
- Santander
- Lloyds
- RBS

Application Information

To apply for a loan under the new National Loan Guarantee Scheme, simply contact one of the banks involved in the scheme. The application process is very similar to that of a standard loan.

Regional Growth Fund Department of Business Innovation and Skills (BIS)

Minimum award: £1m
Maximum award: N/A

Eligibility

Bids will be accepted from private companies and public private partnerships. Applications can come from individual companies or consortia.

Description

The Regional Growth Fund is 2011-2016 funding operation worth £2.6 billion across the England. The £2.4 billion were used for the 3 rounds of the process to leverage more than £13bn of private sector investment and safeguard over 500,000 jobs. An additional £350m has been committed to the fund (Round 4).

The fund is targeted to provide support for projects and programmes that have significant potential for creating long term private sector led economic growth and employment. The fund is open at all project types. However it is a competitive bid process with applications being reviewed against other entrants with winning projects. Those deemed most capable of contributing to long term private sector led economic growth and employment will receive funding.

Applicants will compete for a share of the £350 million allocated to the Fund in the 2012 Autumn Statement.

On 19 June the sixth round of the RGF was launched at the Manufacturing Summit in Liverpool. £200 million of funding become available with bids invited from 19 June to 30 September.

Full information is available here:

<https://www.gov.uk/understanding-the-regional-growth-fund>

Application Information

The deadline for the RGF team to receive bids is midday 30 September 2014. Further details are listed in the [Information for applicants](#) document page 5.

Exceptional Regional Growth Fund (eRGF) Department of Business Innovation and Skills (BIS)

Minimum award: N/A
Maximum award: N/A

Eligibility

Bids will be accepted from private companies and public private partnerships. Applications can come from individual companies or consortia.

Please see for full eligibility criteria here:

<https://www.gov.uk/understanding-the-regional-growth-fund#who-is-eligible-to-apply-to-round-4>

Description

Exceptional Regional Growth Fund (eRGF) support is the award of RGF money to a project or programme outside of competitive bidding rounds.

Application Information

Organisations interested in applying for eRGF support should contact their local BIS office. BIS will discuss with prospective applicants alignment with the criteria before recommending whether the bidder should make a formal application for eRGF support. Contacts for BIS Local can be found at

Grant for Research & Development (GRD) Solutions for Business Department of Business Innovation and Skills (BIS)

Minimum award: n/a

Maximum award: depends on company size and project type. See description below.

Eligibility

Any SME with fewer than 250 employees can apply. Eligible projects should be based around an innovative product or process which could be brought to market with the help of GRD.

Description

The schemes are government grants to help SMEs carry out research and development into innovative technologies by exploiting new ideas. Businesses can find it difficult to gain private sector investment in research and development, but the credibility of GRD support can help. It's a way of reducing the risks but not the rewards of innovation. There are 4 categories:

Micro Projects – are aimed at micro entrepreneurs or businesses with less than 10 staff and turnover of less than €2 million. The maximum grant value is £20,000 with a funding rate of 45% of the project's costs.

Research Projects – are aimed at small businesses with less than 50 employees and turnover of no more than €10 million. The maximum grant value is £100,000 with a funding rate of 60% of the project's costs.

Development Projects – are aimed at SMEs with less than 250 employees and a turnover of no more than €50 million. The maximum grant value is £250,000 with a funding rate of at least 35%.

Proof of Market – are aimed at SMEs with less than 250 employees and a turnover of no more than €50 million. The maximum grant value is £20,000 with a rate of 60% of the project's costs.

Application Information

You can apply for a GRD all year round, but your application will need to demonstrate:-

- The requirement for the grant.
- Commercial potential of the product or process.
- Experience, skills and track record of the project team.
- Technical risk and technological innovation.
- Any wider environmental or social benefits.

Applicants should ensure they can address the issues of match funding availability, protection of intellectual property, project management capabilities and collaboration with academia.

The award of a grant is discretionary.

Contact Details

This scheme is available nationally. To date it has been accessible through Regional Development Agencies. The Business Link is likely to be the best contact for information during this period of transition.

Useful Links

Grant for Business Investment (GBI) Department of Business Innovation and Skills (BIS)

Minimum award: £10,000

Maximum award: From 10% to 35% of capital expenditure costs depending on location and company size.

Eligibility

Eligibility is geographically determined by Assisted Area boundaries. In tier 1&2 assisted areas SMEs and large companies can apply, in tier 3 areas only SMEs can apply. To check whether you are in an assisted area follow the link to use a postcode checker <http://www.dtistats.net/regional-aa/aa2007.asp>

Description

Targeted support for businesses making capital expenditures in key assets such as buildings and plant machinery which will increase productivity, skills and employment in specific regions of England. The maximum grant available (a % of capital expenditure costs) is dependent upon company size and location. Within Assisted Areas (Tier 1 and 2)

- Small companies can receive up to 30-40%
- Medium companies can receive up to 20-25%
- Large companies can receive up to 10-15%

In Tier 3 locations small companies can receive a maximum of 20% and medium companies 10% of capital expenditure costs.

Enterprise Finance Guarantee Solutions for Business Department of Business Innovation and Skills (BIS)

Minimum award: £1,000
Maximum award: £1m

Eligibility

Any business operating in the UK with turnover up to £41 million can apply but any application will be based on the lenders own commercial criteria for lending before the EFG facility can be applied.

Description

The Enterprise Finance Guarantee (EFG) is a UK government guarantee lending scheme intended to help businesses that may be struggling to secure finance, by facilitating bank loans between £1,000 and £1 million. The loan can be used for purposes such as acquisition/purchase of businesses, land/property purchase or to refinance existing borrowing facilities afforded by the lender.

Terms for the loan are between 3 months and 10 years and a guarantee premium is payable to the Government to the value of 2% per annum on the reducing balance of the loan which is payable to the Department for Business, Innovation and Skills (BIS).

EFG currently supports £1.7bn of SME lending that otherwise would not have been made. 43 lenders are currently accredited to offer EFG loans. The Government is adapting EFG to bring in a wider range of finance providers, which will for the first time provide Government guarantees to support trade credit, increasing the amount available to SMEs.

At Budget 2013, Government announced it will expand EFG to help bridge 'affordability gap' by providing a guarantee to the lender of up to 25% of the overall cost of repaying a loan; and, to support businesses lacking track record who are seeking under £25k loans.

Application Information

To apply, you will need to visit your lender and typically demonstrate:

- A comprehensive business plan.
- Two years audited accounts or current management information.
- Financial projections.
- Information on any public funds received in the past 3 years.

Other financial information in support of your application may be required. The lender will then decide if your proposition is viable but if your business lacks the necessary security then the lender may choose to lend using the EFG facility to guarantee the finance needed.

Contact Details

Please contact your lender for more details.

Finance for Business Solutions for Business Department for Business, Innovation and Skills (BIS)

Minimum award: N/A

Maximum award: up to £250,000 in loans, up to £2m in equity investment

Eligibility

Funding is available to businesses with less than 250 employees and a turn-over of up to €50 million or a balance sheet of up to €43 million (EU definition of a medium sized company).

Description

Finance for Business is a product under the Solutions for Business program from BIS.

It provides a range of finance funds for businesses with viable business plans unable to get support from commercial banks and investors. Nationwide options and Regional Development Agency options are available for the procurement of both debt and equity funding.

Equity funds address this market failure by providing approved fund managers with access to public funds to promote deal flow. These funds are aimed at new and fast growing businesses, particularly in new sectors, perceived as too high risk by commercial financiers because of a lack of track record/collateral.

Debt funds are intended to enable the growth of the mezzanine finance approach and to address the difficulties some businesses (particularly those in newly emergent sectors with intangible assets and those seeking to expand rapidly) experience in raising finance, which are not met by measures to support lenders. Loan support is only available where interest rates are charged above commercial rates (in line with State Aid rules and reflecting the higher risk which commercial lenders are unwilling to meet), where the borrower has been unable to raise finance from commercial lenders despite appropriate signposting and awareness raising (such as finance and investment readiness support) and where there is a viable business plan.

Application Information

Applications are made through referrals. These occur through publicly funded Investment Readiness programmes as well as lawyers, accountants and business advisers who are aware of a wide range of potential investors and funds.

Contact Details

There is no single access point. Referrals occur through publicly funded investment readiness programmes and sign posting through business link, lawyers, accountants and business advisers who are aware of a wide range of potential investors and funds.

Finance For Business North East

Minimum award: £1,000

Maximum award: £1.25m

Eligibility

Eligible SMEs based in or relocating to the north east of England, with the aim of helping them to start up, develop or grow.

Description

The £125m Finance for Business programme provides debt and equity finance from the following seven individual funds up to the end of 2014:

- North East Micro Loan Fund
- North East Proof of Concept Fund
- North East Technology Fund
- North East Accelerator Fund
- North East Angel Fund
- North East Growth Plus Fund
- North East Growth Fund.

A The fund is financed jointly by a loan from the European Investment Bank and grants from the European Regional Development Fund and UK Government

In July 2013, the negotiations started to secure additional funding to allow the programme to continue investment through to December 2015. If the deal is confirmed, the additional cash is expected to support around 75 businesses and create or safeguard 500 jobs across the North-east. A decision is expected later this year.

Application Process

Please contact North East Finance directly for application details.

Motorsport Valley Launchpad

Minimum award: £50,000
Maximum award: £200,000

Eligibility

Projects developing a relevant technology, product or leveraging motorsport engineering skills and experience are all eligible for funding.

Description

Technology Strategy Board announced £1m investment in innovative R&D projects with a focus on organisations engaged in motorsport, high performance engineering and commercial activities related to the 'Motorsport Valley cluster'. The investment will support those projects which will last up to 18 months and are led by micro, small and medium sized businesses. Successful applicants can participate in a programme of business support and growth activities, including support to access external finance to fund a proportion of the project costs or commercialisation of the outcomes of the project.

Application Process

The competition is being run in two stages.

1. Video proposal – where applicants describe their idea in a two-minute video. The deadline for video submissions is by noon on 31 July 2013.
2. Written proposal – for applicants shortlisted based on their video proposal.

The competition opens for uploading video proposals on 24 June 2013. More information and guidance on how to apply is available from this date: see www.innovateuk.org under Competitions and register to apply.

The Manufacturing Advisory Service (MAS)

Minimum award: N/A
Maximum award: N/A

Eligibility

The service is either free or subsidised for SMEs. It is only available to large business (more than 250 employees) at the full market rate.

Description

The Manufacturing Advisory Service (MAS) works to support manufacturers based in England. MAS has a team of specialist manufacturing advisors dedicated to helping SME manufacturing businesses improve and grow. A MAS advisor can provide a free review of the business, identify priority areas and may then be able to offer some grant funding to contribute towards improvement costs or projects. MAS also provides training and networking events to help improve awareness and skills related to manufacturing. Types of support available:

1. Free helpdesk and research service - a quick query service. Our experts will be happy to answer questions on a wide range of technical issues or could spend up to 2 hours researching problems that manufacturers are facing. Call 0845 658 9600 or email advice@mymas.org.
2. Manufacturing review free to SME manufacturers - experienced Manufacturing Advisors will carry out a hands-on assessment and diagnostic of the business that will highlight areas of opportunity or action that can be taken to improve operational performance. All initial advice relating to this is also free of charge.
3. Events - training and networking events to help improve awareness and skills related to manufacturing issues and best practice. See the events section of the website www.mymas.org/events for details of events in your area.
4. Subsidised consultancy support for SMEs - MAS can provide up to 50%* of the cost of an expert to help to improve business. MAS is able to consider funding projects that look at virtually any aspect of the business, from products, processes and people, through to supporting improvements within the supply chain and accessing new markets.*
5. Signposting and referral - for non-manufacturing queries, such as human resources, legal or environmental issues, MAS works closely with a range of organisations to ensure manufacturers have access to a full range of business support services, we can help find the expertise a business needs.

*All funding is subject to meeting the eligibility criteria and must be matched at 50% by the client.

Application Information

To find out how MAS can help your manufacturing business grow, sign up for a free manufacturing review at <http://www.mymas.org/resources/manufacturing-review-sign-up-page/online>

Contact Details

Innovation Advice & Guidance
Solutions for Business
Department for Business Innovation and Skills (BIS)

Minimum award: N/A
Maximum award: N/A

Eligibility

This product is available to:

- small and medium-sized businesses
- businesses owned or controlled by people from groups who are under-represented in business ownership

Large businesses, employing more than 250 employees, are eligible for this scheme but will be expected to pay the full cost of the service.

Social enterprises are able to benefit from innovation advice and guidance where this can assist their sustainability and ability to reach a significantly larger audience or market for their activity.

Description

Products and services in the Solutions for Business portfolio are designed to help qualifying businesses grow and succeed. Innovation Advice and Guidance is a Solutions for Business product that provides businesses with expert knowledge and advice enabling them to innovate and improve the performance of their business.

The programme consists of an initial one day review to decide how the business could benefit from support in developing innovation. Subsequently, the program can offer:

- Help building Innovation into the 'Business Strategy' and identifying support and resources required
- Establishing an innovation culture within the business supported by appropriate internal processes and external networks
- Support the completion of market analysis required to support the market strategy
- Product and process development, supporting and involving relevant expertise to incorporate resource efficiency or clean technology development for example
- The protection and development of Intellectual property

Innovation Vouchers

Minimum award: N/A
Maximum award: £5,000

Eligibility

Five key criteria:

- business need to be a start-up, micro, small or medium-sized, located in the UK
- this should be the first time that the company have worked with the chosen knowledge supplier
- the idea that business want help with should be a challenge and needs specialist help
- the idea should be applicable to one of the priority themes
- organisation have not had an Innovation Voucher from the Technology Strategy Board before.

Description

An Innovation Voucher provides funding for businesses to gain external expert advice to help with innovation, development and growth. Experts could advise on an innovative idea, learning more about design or the management of the intellectual property.

Application Information

The application process is online, through the Technology Strategy Board website.

You can apply anytime, with around 100 vouchers being awarded once every three months - October, January, April and July each year.

As part of making an application, companies need to register with online web platform _connect to enter details about the business. Businesses can also register in advance of applying at <http://connect.innovateuk.org> which will also give access to a range of information.

Contact

If you require further information or have a query regarding Innovation Vouchers, please contact the Technology Strategy Board's Business Support Group on:

Innovation Vouchers for Cyber Security

Minimum award: £5,000
Maximum award: £5,000

Eligibility

Open to all SMEs and sole traders of all sectors.

Description

Businesses are the biggest victims of cyber crime and the Government has the objective of making the UK one of the most secure places in the world to do business in cyberspace.

Innovation Vouchers for cyber security can be used to secure specialist consulting and services to help:

- businesses looking to protect new inventions and business processes
- businesses looking to 'cyber audit' their existing processes
- businesses looking to move online and develop a technology strategy
- business start-ups looking to develop an idea into a working prototype and needing to build cyber security into the business from the very beginning.

Application Process

Opening date: 15/04/2013
Closing date: 24/07/2013

To apply for an Innovation Voucher, you must register via the Innovation Vouchers portal at <https://vouchers.innovateuk.org>.

Contact Details

If you require further information please contact Technology Strategy Board's Business Support Group via e-mail competitions@innovateuk.org or phone 0300 321 4357.

Coaching for High Growth SMEs Solutions for Business Department for Business Innovation and Skills (BIS)

Minimum award: N/A
Maximum award: N/A

Eligibility

The coaching program is available to SMEs that are already established with a potential to increase employment or turnover by 20% or more each year for three years.

Available to start-ups with the potential to become 'gazelles' i.e. able to achieve £1million turnover within 3 years of starting trading or to have at least 10 employees within 3 years.

Description

Business Coaching for Growth is available from January 2012 and will offer:

- Coaching of senior management teams to develop and implement growth strategies and develop leadership and management skills
- Tailored, specialist help to develop a successful investment pitch
- Facilitated introductions to potential investors
- Access to high quality facilities by partnering with leading business incubators, science parks and Catapult centers (previously Technology Innovation centers).
- Advice on how to identify and protect intellectual property and copyright and develop strategies to commercially exploit IP and innovation
- Fast track access to trusted sources of specialist advice and support such as the Technology Strategy Board and UKTI
- Access to business and knowledge networks.

Management of the coaching will fall to Local Enterprise Partnerships (LEPs) to ensure local economies interests are prioritised and that local business support services are fully integrated.

Application information

The programme was launched in January 2012. You should contact your local LEP for application details.

Understanding Finance for Business Solutions for Business Department for Business Innovation and Skills (BIS)

Minimum award: N/A
Maximum award: N/A

Eligibility

Open to SMEs with a lack of understanding around their financial options, the skills to develop a funding proposition, or access to potential investors.

Description

The programme helps to broaden and deepen business's awareness and knowledge of external sources of finance. It involves breaking down your business' financial requirements and finding out what type of finance is right for your company, as well as targeting possible sources and potentially providing access to them. It is a free advisory programme that can help companies secure the financing or funding they require.

Application Information

Access to this programme is dependent on your area. It was previously managed by RDAs so could fall to LEPs to manage in the near future. Check through your local RDA website or through business link for more information.

Contact Details

Contact details are dependant on your area. Contact your Local Enterprise Partnership for more information.

**Work Place Training, inc. apprenticeships
Solutions for Business
Department for Business Innovation and Skills (BIS)**

Minimum award: N/A
Maximum award: N/A

Eligibility

This program is only available to SMEs.

Description

The programme is broken down into three parts, Apprenticeships, other Work-based training and SME Management and Leadership.

Under the Apprenticeships section, you can get support to employ an apprentice to help ensure you have access to the practical skills you require to grow. There are nearly 200 Apprenticeship frameworks to cover all aspects of business.

The Workplace Training section offers fully-funded literacy and numeracy training for employees within an SME. Funding only qualifies for the first qualification (level 2 or level 3). Subsequent training must be alternatively funded.

SME Leadership and Management training offers free skills needed analysis and help starting a personal development plan. This is followed by access to up to £1,000 of grant funding to help with training for identified skills. Follow up support is also provided to ensure progress and development is achieved. Funding can needs to be matched by the employing organisation.

Application information

Application for the Apprenticeship programme is conducted through the following website:
www.apprenticeships.org.uk

Both the Workplace Training and SME Leadership and Management Training are managed by:
<https://www.gov.uk/>

You will need to contact your Local Enterprise Partnership for more information.

Assisted Asset Purchase Scheme (England)

Minimum award N/A
Maximum award up to £500k

Eligibility

Eligible business is an SME located in England looking for bank finance but lacks sufficient deposit. Full eligibility criteria could be found [here](#).

Description

Lloyds Banking Group's Assisted Asset Purchase Scheme is supported by the Government's Regional Growth Fund (RGF). The bank has been allocated £25 million to provide grants to qualifying SMEs from June 2013 through to April 2015.

SMEs looking to purchase an asset and create or protect jobs, but lack a sufficient deposit to meet banks normal lending requirements, could be eligible for a grant under the Assisted Asset Purchase Scheme.

The scheme is currently available and can provide: up to £500k grants; £100k of funding; £15,000 for every protected job.

Application Information

To find out more about the Assisted Asset Purchase Scheme or eligibility, speak to your Relationship Manager. Your Relationship Manager will assess your lending application in the normal way and help to determine if you are eligible for a grant.

Access to Finance Grant Scheme (England)

Minimum award 25,000
Maximum award 750,000

Eligibility

SMEs in manufacturing, industrial and business-to-business sectors based in England areas can apply for the funding.

Full criteria could be found [here](#).

Description

UK Steel Enterprise Grant funding is available through our Access to Finance Grant Scheme and is part of the Regional Growth Fund programme which runs until March 2015. The scheme provides grant support in combination with our existing equity and/or loan funding packages and is principally available for capital investment projects which create or safeguard jobs.

The scheme provides a package of support including grant funding alongside UK Steel Enterprise loans or equity/loan packages from £25,000 up to £750,000. The amount of grant available will depend on a number of factors such as the location of the project, the size of the company, the number of jobs and the amount of funding provided by UK Steel Enterprise, but could be up to 35% of eligible expenditure.

Application Information

Applicants are encouraged to make general finance enquiries via the online [form](#).

Employer Ownership of Skills Pilot (EOP)

Minimum award N/A
Maximum award N/A

Eligibility

All bids must be led by a named employer to demonstrate that proposals are driven by and respond to their needs. Evidence of a lead employer will be asked for in the application form.

Full details could be found:

<http://www.ukces.org.uk/ourwork/employer-ownership/prospectus/eligibility>
<http://www.ukces.org.uk/ourwork/employer-ownership>

Description

The Employer Ownership of Skills pilot is a competitive fund open to employers to invest in their current and future workforce in England. Employers are invited to develop proposals that raise skills, create jobs, and drive enterprise and economic growth. Government will invest in projects in which employers are also prepared to commit their own funds in order to make better use of our combined resources.

Additional information

The current Round of the pilot asks employers to develop and deliver solutions which enable them to recruit and train staff with the skills they need for the future.

Application Information

Bidders need to register their interest by 11 March 2013. The deadline for full and outline bids is 28 March 2013.

Full application details are listed on the UKCES website:

<http://www.ukces.org.uk/ourwork/employer-ownership/prospectus/applying-for-funding>

The Improving Engineering Careers fund

Minimum award: £40k
Maximum award: £1.6m

Eligibility

The organisation must be registered as a company in the UK but the corporate headquarters does not have to be in the UK. Also, the business must directly employ people in engineering. Full criteria are listed in the [guidance document](#).

Description

The Improving Engineering Careers fund is an opportunity for government to support training that can lead to the progression of individuals through an engineering career - from skilled operatives through to associate professionals and those on pathways through to professional status. Applications should make clear that the training assists in this progression. It does not need to lead to a change in professional status as a direct result of the training but should not be training that simply broadens an individual's skills at a certain level without prospect of progression.

The fund has a pot of £10 million. The offer will be a co-investment between an employer and government. Funding will be available for up to 50% of the costs of training that leads to skills that are portable and can be used in other companies and occupations (transferable skills) as allowed under the State Aid exemption regulations. The maximum funding allowable will be the sterling equivalent of the maximum allowable under the EU State Aids General Block Exemption Regulation rules. That is €2 million Euros per project. For practical purposes government will provide a maximum contribution of £1.6m. The total grant allocated will be available to support training over financial years 2014/15, 2015/16 and 2016/17. The funding for the final year will need to be provisional as the Department does not have a budget for this activity beyond the current Spending Review period.

A further £10 million of the fund will be directed to a call to 'Developing Women Engineers'.

Application Information

The fund opened on 19 June and will run for 24 weeks to 12 noon on Friday 05 December 2014.

The applicants must register on the BIS e-tendering portal and then complete an application form. The process is fully explained [here](#) (page 8).

Enterprise Capital Funds Department for Business Innovation and Skills (BIS)

Minimum award: N/A
Maximum award: £2 million

Eligibility

Only SMEs are eligible for equity financing through the Enterprise Capital Fund. Funds are managed by individual fund management companies so will be more likely allocated to those with a higher potential growth and return of investment. There are further terms and conditions that affect the level of capital available. This is dependant on the factors such as the level of private investment.

Description

ECFs are funds from BIS that are allocated to the Capital for Enterprise Limited (CfEL) company. This company also looks after the Enterprise Finance Guarantee. The funds are then distributed to independent fund managers.

As announced at Budget 2013, further £25m will extend the Enterprise Capital Fund programme to include a VC Catalyst Fund, which will invest in venture capital funds that specialise in early stage venture capital and are near to close, enabling them to commence investment in SMEs.

Application process

Applications are handled by the ECF fund managing company you wish to work with. The list of fund managers, along with their contact details and web links are available here:

<http://www.capitalforenterprise.gov.uk/ecfp>

The bank aims to attract private sector funding so that when fully operational it could support up to £10 billion of new and additional business lending. The Government will build a single institution that will address long-standing, structural gaps in the supply of finance.

It will bring together Government finance support for small and mid-sized business. It will also control the Government's interests in a new wholesale funding mechanism which will be developed to unlock institutional investment to benefit small business.

The bank will use existing government guarantee schemes to leverage up to £10bn in financial support.

British Business Bank firstly unveiled in September 2012 will start work in April 2013. The bank itself will be fully operational from autumn 2014.

The plans for 2013 were:

- launch an investment scheme of £300 million in spring 2013 aiming to help diversity and expand the supply of lending to SMEs and mid-sized businesses
- expand Business Angel Co-investment by £50 million for SMEs
- extend commitments to venture capital by £25 million
- maintain the Loan Guarantee cap at 20% for Enterprise Finance Guarantee loan portfolios for 2013-2014.

According to the autumn statement (5 December 2013) the government will provide a further £250m of unspent money from the Business Finance Partnership to support investment in late stage venture capital funds, launch a new scheme to support provision of lease and asset finance and launch a programme of wholesale guarantees for SME loans.

Growth and Innovation Fund (GIF) UK Commission for Employment and Skills (UKCES)

Minimum award: £500,000 pa (for two years)
Maximum award: N/A

Eligibility

Eligibility is centred on employer-led organisations. Organisations or consortia representing a sector or region are the preferred type of applicant. To confirm your eligibility, use the GIF eligibility checker at <http://www.ukces.org.uk/ourwork/investment/growthinnovationfund/eligibility>

Description

The GIF provides funding to organisations looking to develop skills solutions or infrastructure that will help support growth and competitiveness across supply chains in a range of sectors in the UK. These could range from the creation of industry standards to the set up of guilds. The GIF will look to co-fund these skills development initiatives through the provision of £34m of funding in 2012-2013 with comparable levels of investment planned for the following two years.

The GIF will only support initiatives that will realistically:

- Make a significant impact on enterprise, productivity & growth
- Draw in greater employment investment in the medium term to meet skills challenges
- Be sustainable past the period of GIF funding
- Achieve a step change in the scale, quality relevance and impact of how skills are delivered, acquired, developed and applied.

The GIF will support clusters of employers, either through a supply chain or a region, so applicants are encouraged to approach UKCES through a consortium or body representing multiple companies. Organisations such as trade associations, national skills academies and even local enterprise partnerships (where they are legally constituted bodies) are encouraged to apply on behalf of those they represent. In addition, the GIF will look to address an area where a market failing or skill based obstacle has been established and there is employer support for the proposition as well.

Application Process

The initial stage involves checking eligibility using the online checker. If eligible, a two staged process is employed. The first is an Outline Proposal application. This is reviewed through a scoring process by the GIF board. If successful, bidders will move onto the Development Phase, which involves working with selected organisations to help develop a full proposal. From there, a full proposal is submitted and the Board makes a final decision as to whether the funds are allocated or not. It may be important to note that if unsuccessful, an organisation can apply on one further occasion. The GIF board will meet at intermittent times during the year and outline applications will need to be submitted a few months before these dates, so timing is important.

Research and Development Relief for Corporation Tax HM Revenue and Customs

Minimum award: N/A

Maximum award: SMEs can claim 225% of qualifying R&D costs. Large organisations can claim 130% of qualifying R&D costs as long as R&D expenditure is at least £10,000 per annum, or from April 2013, large organisations will be able to claim at a rate of 10% under the new 'above the line' (ATL) tax credit system.

Eligibility

SMEs can claim back R&D expenditure even if they do not have corporation tax liability. Under the same superdeduction system, large organisations can only claim up to 130% of qualifying costs if they have a corporation tax bill. Under the new ATL system, large organisations are eligible to claim if they do not have corporation tax liability, as long as they have qualifying R&D costs in the UK.

Description

R&D tax relief may reduce your company's tax bill by more than your actual expenditure in allowable R&D costs. An SME may choose to receive a tax credit (a cash sum paid by HMRC) rather than tax relief. To qualify the R&D project must advance the overall knowledge or capability in a field, not just progress the company's own knowledge or capability. The research must be undertaken in an area related to your organisation's trade and if you're claiming under the SME scheme you must prove you will own any intellectual property arising from the project. For R&D Relief to apply, your company must spend at least £10,000 on qualifying R&D costs in an accounting period. According to Budget 2014 announcement the SME R&D tax credit scheme will increase from 11% to 14.5% from April 2014.

For large organisations, the new ATL system will be paid at a rate of 10% and is fully payable (after tax) to companies that have no corporation tax liability. The new ATL system will run alongside the existing 130% superdeduction tax rate for large organisations until April 2016, after which the ATL system will become mandatory. This will allow large organisations to adjust to the change. To prevent abuse, there will be a (PAYE/NIC) cap on the payment of the credit to companies with no corporation tax liability.

Full details of qualifying costs and how to claim can be found at <http://www.hmrc.gov.uk>

Any subsidies or grants received for R&D during the accounting period may affect the amount of R&D tax relief you can claim

Application Information

If you are claiming tax relief it will reduce your company or organisation's profit chargeable to Corporation tax for the relevant accounting period. Simply fill in your tax return. If you've chosen to receive tax credits instead, or if you have submitted a claim to carry back a loss to be set off against profits of a previous accounting period, then HMRC will make the payment after they have received your return.

Innovations in Electronics Manufacturing

Minimum award Not available yet
Maximum award Not available yet

Eligibility

Organisations with R&D projects in manufacturing electronic systems.

Description

The Technology Strategy Board will invest up to £4.75m in Collaborative R&D projects and Feasibility Studies to stimulate innovation and growth in manufacturing Electronic Systems. The competition is looking to fund projects that use novel technologies in the manufacturing process to enhance functionality, reduce size/cost, adapt form and/or enable rapid scale-up.

The competition will be launched under 2 strands:

- Collaborative R&D projects: projects up to £500k and 12-24 months duration
- Feasibility Studies: projects up to £75k and 6-9 months duration.

Application Information

Applications process opens on 17 February 2014.

The decision will be made based on:

- Sector attractiveness (large global market, growth, UK R&D intensity)
- The 22 national competencies
- Technology readiness
- Additionality

Enterprise Investment Scheme (EIS) HM Revenue and Customs

Minimum award: N/A

Maximum award: Companies are not allowed to raise more than £2million in any 12 month period from the three venture capital schemes, the EIS, the Corporate Venturing Scheme (CVS) and Venture Capital Trusts (VCTs), Investments from any or all of these schemes must fall within the £2m limit.

Eligibility

Companies must be unquoted at the time the shares are issued and with no arrangements in place to become a quoted company, although it can subsequently become a quoted company without investors losing relief.

Description

The Enterprise Investment Scheme (EIS) is designed to assist smaller higher-risk trading companies raise finance by offering a range of tax reliefs to investors purchasing new shares in those companies.

There are rules to abide by for any companies and investors interested in participating in the scheme and it is vital that you familiarise yourself with these which can be found at <http://www.hmrc.gov.uk/eis>. It is recommended that companies and individuals seek professional advice, in the first instance contacting the HMRC.

Application Information

If the scheme is of interest to you then the first step is to contact the Small Company Enterprise Centre at the HMRC who will assist in determining whether the company/investors qualify for tax relief.

Seed Enterprise Investment Scheme (SEIS) HMRC

Minimum award N/A
Maximum award N/A

Eligibility

Small, early-stage companies are eligible.

Description

The Seed Enterprise Investment Scheme (SEIS) was set up in April 2012 and is designed to help small companies to raise equity finance by offering a range of tax reliefs to individual investors who purchase new shares in those companies. SEIS is intended to recognise the particular difficulties which very early stage companies face in attracting investment, by offering tax relief at a higher rate than that offered by the existing Enterprise Investment Scheme.

Additional information

The requirements at the time of shares issue could be found on HMRC website:
<http://www.hmrc.gov.uk/seedeis/how-to-qualify.htm>

The requirements for investment and investor could be found on the following link:

Business Finance Partnership (BFP) HM Treasury

Minimum award N/A
Maximum award N/A

Eligibility

Businesses in the UK with a turnover of up to £500 million.

Description

The Business Finance Partnership (BFP) aims to increase the availability of capital through non-bank lending. In the longer term the partnership will be looking in the ways of finding new sources for finance accessible to businesses.

Additional information

The first successful proposals were announced at Autumn Statement 2012. The Government will invest £600 million alongside an initial £650 million from the private sector to create four new funds that will lend to mid-sized companies. These funds are now open for business and will greatly expand the market for such lending in the UK.

The fund managers are Alcentra Limited, Haymarket Financial, M&G Investment Management and Pricoa Capital. An additional £100m is expected to be invested with a fifth fund manager shortly.

At Budget 2013, Government announced that the £300m investment programme will build on the recent investments made by the Business Finance Partnership. This will be focused on promoting diversity of supply by encouraging new entrants and the growth of smaller lenders in the market. The programme will be launched and proposals invited from Spring 2013.

Application Information

Application information could be obtained from the fund managers directly. Please see the details below.

Business Finance Partnership (BFP) Small Business Tranche HM Treasury

Minimum award N/A
Maximum award N/A

Eligibility

The channels chosen by the scheme will invest in businesses based in the UK and with a turnover of up to £75 million.

Description

The Business Finance Partnership (BFP) aims to increase the availability of capital through non-bank lending. In the longer term the partnership will be looking in the ways of finding new sources for finance accessible to businesses.

Additional information

The Department for Business, Innovation and Skills will invest up to £100 million of the BFP through non-traditional lending channels that lend directly to small businesses. It is expected that these channels will include mezzanine finance funds, supply chain finance schemes and peer-to-peer lenders.

Application Information

BIS launched a Request for Proposals in May 2012 which has now closed. The first investments into businesses through the selected channels will be made from autumn 2012 onwards. 40 proposals requesting BFP funding of £575m were received. These proposals are currently being assessed.

Contact Details

Government's investment in the Small Business Tranche of the BFP will be managed by Capital for Enterprise Limited. The contact details are:

Capital Allowance Investment Scheme HM Revenue and Customs

Minimum award: N/A

Maximum award: up to 100% of capital costs of certain products

Eligibility

Any business that pays income or corporation tax can claim for capital allowances.

Description

A number of Capital Allowance Investment schemes have been introduced to encourage investments where up to 100% First Year Allowance (FYA) is available for energy efficiency, research & development and low CO2 cars. The Government has announced changes will be made to the Capital Allowance Scheme so it is vital to speak to your local HMRC Relationship Manager.

Here is a list of some of the schemes available:

- 40% FYAs for small and medium-sized businesses.
- 100% Enhanced Capital Allowance (ECAs) (FYAs) for energy-saving investments.
- 100% ECAs (FYAs) for water-efficient investments.
- 100% FYAs for low CO2 emissions cars and gas refuelling infrastructure.
- 100% Research and Development Allowances.

The HMRC have several manuals available on their website regarding each scheme which give you in depth detail on what you can claim on, even if expenditure occurred in previous years.

Application Information

Claim allowances via your company's tax return.

Contact Details

Please contact the HMRC directly or your HMRC Relationship manager. To find your local HMRC office please visit:

Enhanced Capital Allowances (ECA) HM Revenue and Customs

Minimum award: N/A

Maximum award: £250,000

Eligibility

Available for businesses purchasing designated plant and machinery which is energy efficient, reduces water or improves water quality. Loss-making companies may also benefit from the scheme receiving cash payments from the Government by surrendering losses attributable to investment in qualifying technologies.

Description

The Enhanced Capital Allowances (ECA) scheme provides tax relief for businesses that invest in equipment that meets the scheme's energy-saving criteria. The scheme allows businesses to write off the whole cost of equipment in designated technologies against taxable profits of the period of investment.

There are two different groups of energy-saving technology that qualify for an ECA. Both lists are reviewed and updated regularly and should be checked on-line for the latest version.

- The Energy Technology Criteria List: This list is continuously reviewed to ensure that it reflects the current technological progress in the market. For the latest copy, see below <https://etl.decc.gov.uk/etl/site/criteria.html>
- The Energy Technology Product List: This lists products and technologies that are eligible for an ECA, including details about the maximum claim values for qualifying products which are a part of a larger plant and/or machinery which itself does not qualify for ECA. To search the list of eligible products, check here: <https://etl.decc.gov.uk/etl/site/etl.html>

Application Information

Claims for ECA should be submitted as part of your normal corporate tax return, where you must include invoices and all relevant evidence and documentation from the company that the item has been purchased from.

You may still claim ECA if your company has not made any taxable profit by surrendering losses credited to ECA in return for cash payment from HMRC. The maximum credit that you can claim is limited by the total PAYE and national insurance payments for the year which the claim is made, or if greater £250,000.

Contacts

You should talk directly to the HMRC, please follow the link to find your local HMRC Office.

Time to Pay Arrangements (TTP) HM Revenue and Customs

Minimum award: N/A
Maximum award: N/A

Eligibility

TTP Arrangements are available to any business (or individual) facing difficulties in meeting their tax bill.

Description

TTP is available to businesses who are worried about being able to meet their tax, NI, VAT or other payments owed or becoming due to HMRC. The TTP arrangement allows companies to pay their tax over an affordable period, typically over a few months however, this is arranged on a case-by-case basis.

In order to qualify for the arrangement the business or individual have to demonstrate that they are:

- In genuine difficulty
- Unable to pay their tax on time
- Likely to be able to pay if the HMRC permit more time to pay their liabilities.

Application Information

The HMRC will determine the arrangement on a case-by-case basis to determine a time scale suitable to bring the tax liabilities back up-to-date within in a reasonable timescale that is appropriate to the case. The agreement can be reviewed or extended if circumstances change but you must keep contact with the HMRC to continue discussions.

Contact Details

Contact the Business Payment Support Service on 0845 302 1435 or contact your HMRC customer relationship manager.

Patent Box HM Revenue and Customs

Minimum award: N/A
Maximum award: N/A

Eligibility

All companies with profits derived directly from patents will be eligible for the patent box tax reduction.

Description

The patent box is 10% corporation tax rate applicable to profits from patent based revenue. This includes revenue through licensing, sales of patented products or from patented processes or services. The applicable corporation tax is reduced to a rate of 10%. This aims to ensure the UK remains internationally competitive as a place to keep and exploit patents and intellectual property (IP).

The reduction will be employed from the 1 April 2013 budget onwards. It will be phased in over 5 years to moderate the possible popularity impact on the wider budget. Profits that are eligible will be carefully calculated and will specifically account for IP or patent based profits. Profits from European patents will also be eligible for relief.

Application Information

The scheme is applicable via a businesses tax return from April 2013.

CRC Energy Efficiency Scheme

Department of Energy and Climate Change

Costs: Initial allowance costs are £12 per tonne of CO₂. There is an opportunity to trade allowances on the open market.

Eligibility

Qualifying organisations have to have at least one half-hourly electricity meter (HHM) settled on the half-hourly market or have a total half-hourly electricity consumption exceeding 6,000 megawatt hours during 2008. The scheme is not optional; if you meet these criteria you should be involved.

Description

The CRC Energy Efficiency Scheme (formerly known as the Carbon Reduction Commitment) is the UK's mandatory climate change and energy saving scheme, which started in April 2010. It is a core part of the UK's strategy for energy efficiency and reduction in CO₂ emissions.

The aim of the scheme is to raise awareness within large businesses and to encourage changes towards improved energy efficiency. The scheme provides financial incentives for large businesses to buy allowances matching their annual emissions, this is to encourage businesses to set targets to reduce their allowances and find cost-effective methods through energy management strategies.

Application Information

If you think your organisation is liable for CRC then you should register at:
<https://crc.environment-agency.gov.uk/crcregistry/web/login?execution=e1s1>

Plugged-In Car Grant Office for Low Emissions Vehicles

Minimum award: 25% of purchase price of car
Maximum award: £5,000

Eligibility

Open to purchasers, both private and fleet, of ultra-low carbon vehicles.

Description

This is a consumer incentive to encourage the uptake of ultra-low carbon vehicles. The subsidy delivers a 25% reduction in the purchase price of the vehicle up to a maximum value of £5,000.

Cars eligible for the subsidy will have to demonstrate compliance against safety and performance criteria which could be found at <https://www.gov.uk/government/publications/plug-in-car-grant>.

In February 2013 the Office for Low Emission Vehicles (OLEV) launched a £13.5 million grant scheme subsidising householders wishing to install technology to recharge ultra low emission vehicles (ULEVs) at home. The original funding for domestic charge points has now been fully allocated and, to ensure continued support for both consumers in the industry, a new grant scheme is to be put in place.

The new scheme will see £9 million made available to any ULEV owner and also drivers with regular access to one for work who are having a charge point installed at their home. It will provide up to 75% of the total cost of the charge point and installation, up to a maximum of £900. The new scheme will come into effect on 1 September 2014 and will run until 31 March 2015, or until the scheme budget has been exhausted.

Additional Information

There are a number of additional financial incentives relating to the use of electric vehicles, particularly for fleets. These include low company car tax, first year capital allowances and where applicable London Congestion Charge exemption.

Application Process

The previous grant scheme will expire on 30 June 2014, however to facilitate existing installation orders interim arrangements will be made from 1 July until 31 August 2014.

Green Bus Fund Department for Transport (DFT)

Minimum award: N/A
Maximum award: N/A

Eligibility

Open to local authorities and bus companies in England.

Description

This incentive is targeted to local authorities and bus companies to hasten the introduction of low carbon buses across England. Introduced in 2009 the scheme originally had a fund of £30m. This was shared between 24 winning applications to help support the purchase of 350 low carbon buses.

It was then extended with a further £15m in 2010. In the Autumn Statement of 2011, the announcement was made that a further £25m would be made available. £20m of this will be going towards purchases of new green buses. The remaining £5m will go towards retrofitting older London based buses with pollution-reducing equipment along with £5m from Transport for London. In 2012 further £20m were made available to support the additional costs for buying low carbon emission buses.

The £12 million funding (Round 4) for 213 new low carbon buses was announced 27 May 2013. It will deliver better services for passengers while also cut carbon and deliver economic growth. Five bus manufacturers will benefit from orders for their eco-friendly hybrid, electric and gas buses, with many of the buses being assembled in the UK. The manufacturers which stand to benefit are Alexander Dennis Limited, BVD, Optare, Scania and Volvo.

Lambert Tool Kit Intellectual Property Office

Minimum award: N/A
Maximum award: N/A

Eligibility

Open to all businesses and organisations.

Description

The Lambert tool kit provides information, guidelines and templates for business-university collaborations and consortia.

The aim of the tool is to provide collaborative research parties with sufficient information and guidance to ensure robust IP contracts can be set up to protect the interests of all parties involved.

Both university and business interests are represented by appropriate content.

The toolkit provides a number of model agreements that can be used as base contracts, along with guidance notes and a decision guide.

Tradeshow Access Programme (TAP Grants) UKTI

Minimum award: N/A

Maximum award: Up to £1800 towards stand costs.

Eligibility

Open to SMEs travelling abroad with accredited trade organisations. SMMT is an accredited trade organisation. In some circumstances grants of up to £1000 may be awarded for independent attendance at international trade shows.

Description

Every little helps and if you're planning to exhibit internationally then UKTI may be able to provide up to £1,800. The fund is targeted at new exporters with companies being eligible for up to 6 TAP grants providing events take place in a minimum of two countries.

Application Information

The UKTI Customer Service Team can help and guide you. Give them a call on 08452 789 600. Or go directly to your appropriate regional team contact at <http://www.ukti.gov.uk/export/unitedkingdom/contactus.html>

If you are attending an event with SMMT then our International Team can help you with all applications.

Contact Details

UKTI has an HQ both in London and Glasgow; however it is worth highlighting that it also has 2,400 staff in 96 countries. Finding the most relevant person for you is best done via the UKTI website <http://www.ukti.gov.uk/uktihome/contactus.html>

Gateway to Global Growth UKTI

Minimum award: N/A
Maximum award: N/A

Eligibility

Companies need to be either SMEs, have 2-10 years export experience or be innovative.

Description

Gateway to Global Growth is a free service provided by UKTI. They offer a 12 month programme of strategic support tailored to your needs to help grow your company's business overseas. Solutions could be complex, requiring both UK Trade & Investment services and those offered by other public or private sector organisations. Gateway is designed to help you achieve your objectives in a number of ways.

The programme starts with a strategic review with an experienced International Trade Adviser to assess trade development needs and construct a next steps action plan; guidance and mentoring from export professionals and support on specialist subjects. It also includes access to UK Trade & Investment's international network; assistance with market research, language and culture and networking opportunities to learn from other exporters.

Application information

The first step in the application process is to speak with your local International Trade Team to find out if you are suitable for the programme. A list of regional offices is available from here:

Export Credits Guarantee Department UK Export Finance

Minimum award: N/A
Maximum award: N/A

Eligibility

Companies must have a UK base. Each product provided by the Department has its own further terms of eligibility.

Description

The Exports Credits Guarantee Department offers support to companies with a base in the UK looking to export their products or services abroad. The support is provided in the form of a range of products, each tailored to a different trade situation. The products vary in function to cover specific aspects of trade deals; however the value of the contract plays a large part in the relevance of each product. Whilst several products may be applicable to a particular deal, each product is weighted to cover a different risk.

A full list of the products along with a brief description, terms of eligibility and application guidelines are available below:

<http://www.ecgd.gov.uk/products-and-services>

The Department can provide guarantees to both UK and foreign banks that they will receive their loan repayments if the UK exporter or foreign importer defaults for reasons within the terms of the agreement. Their products also include but are not limited to the provision of bond guarantees for banks, insurance of payment for the exporter and lines of credit to foreign buyers. In essence their role is to ensure that UK export deals of substantial size and value are not inhibited by a lack of financial support being available.

Application information

On the whole there is no fee for the application. In the case of guarantees placed on loans, the premium payable is determined on a case by case basis. Some products are only applicable through banks, however the first step for all product application is to speak to customer services: +44 (0) 207 512 7887.

UK Export Finance (UKEF)

Minimum award: N/A
Maximum award: below £50m

Eligibility

Any size of exporter.

Description

UK Export Finance (UKEF) is a government department dedicated in providing support to UK exporters. It does this in a number of ways but primarily by working with UK banks to provide exporters with trade finance solutions to help them win and perform on specific export contracts. It has a range of products which can provide support to exporters of any size. In 2011 UKEF expanded its range of short-term products which are particularly focus at SMEs.

Additional information

The Government announced in the 2012 Autumn Statement that the scheme will be developed to provide up to £1.5 billion of loans for the purchase of UK exports. The above mentioned scheme is operated by UKEF for the three year period. The scheme will focus on the transaction below the £50 million mark.

In addition, the Chancellor announced at the autumn statement 2013 the increase of UK Export Finance support to exporters – including doubling maximum commitment limit to £50bn, broadening scope of existing Direct Lending and Working Capital Schemes, doubling the number of Export Finance Advisors.

Application Information

Criteria various depending on different schemes that UKEF provide. Please check for the individual guides: <http://www.ukexportfinance.gov.uk/products-and-services>

Contact Details

UKEF's customer service team are available to help. Please call 020 7512 7887 for further details.

Applied Research Grant The Carbon Trust

Minimum award: N/A
Maximum award: £500,000

Eligibility

Any business or entrepreneur can submit proposals but all proposals should demonstrate that the project has the potential to result in a substantial reduction in the UK's carbon dioxide emissions or equivalent.

Description

The Applied Research Grant is available to support R&D projects that have a potential to reduce carbon emissions. When a call for proposal is offered, grants are offered up to £500,000 with a minimum 40% matching fund being required.

For projects to be eligible they must demonstrate:

- Innovation – a unique advantage in the current market.
- Potential for CO₂ emissions reduction based on scientific principles
- Commercial viability and that there is a demand from the target market with results planned.
- The project cannot be taken forward without the grant.
- Benefits to the UK low carbon economic growth.
- The impact of the project.

Projects should ideally have a timeline and not last longer than 3 years.

Application Information

Proposals submitted should demonstrate a project which is innovative, technically feasible and commercially viable by delivering benefits to the UK. The grant is granted based on the costs and the matching fund being in place.

To improve your chances of qualifying, you should include the following in your application:

- The minimum amount of funding required.
- The project's budget demonstrating cost effectiveness.
- Collaborative projects to encourage and increase the chances of commercialisation.
- Investments from other parties.

The next call for proposals starts July 2010. To apply, please submit an on-line proposal to the Carbon Trust <http://www.carbontrust.co.uk/emerging-technologies/help-develop-my-technology/pages/how-to-apply.aspx>

Contact Details

Visit the Carbon Trust website www.carbontrust.co.uk to apply.

Business Incubator The Carbon Trust

Minimum award: N/A
Maximum award: £70,000

Eligibility

Entrepreneurs, small businesses or a spin out business from a large company or research institute can apply.

In order to qualify, you must demonstrate:

- potential for CO₂ emissions reduction based on scientific principles
- a realistic business plan with the potential to achieve £500,000 to £1 million through a strong management team
- a unique technology or service proposition

Description

The Carbon Trust Business Incubator scheme provides consulting services from 6 Incubator Partners worth up to £70,000. This is to help entrepreneurs and businesses in a wide range of low carbon issues, such as:

- help the organisation grow by understanding market opportunities
- assist in developing business strategies
- provide expert project development
- finding potential clients, investors and partners

At present, companies who have applied have received £70,000 worth of consulting services and have created revenue by selling low carbon products and have attracted £80 million in investment.

Application Information

To apply, please follow this link <http://www.carbontrust.co.uk/emerging-technologies/help-develop-my-company/expertise/Pages/grow-my-business.aspx> to choose from one of 6 Incubator partners available who will help you with your application to Carbon Trust.

Entrepreneur Fast Track The Carbon Trust

Minimum award: N/A
Maximum award: £500,000

Eligibility

Open to micro and small UK enterprises where any intellectual property being developed or exploited is owned within the UK

Description

The Entrepreneur Fast Track programme is a customised package of expert commercial advice, networking opportunities and grant funding.

Commercial Advice is delivered through commercial and technical consultancy services up to the value of £70k. This can be fully funded by the Carbon Trust and includes:

- Advising on patenting and intellectual property strategies
- Prioritising markets and providing advice on how to enter them
- Building capable management teams
- Help finding customers, partners and investors
- Developing an investor ready business plan and pitch
- Boosting marketing and PR capabilities
- Providing expert engineering, modelling and product development
- Meeting product tests and regulations
- Assistance with scale-up for manufacture

Networking opportunities are also with investors and industry partners and set up through Carbon Trust contacts.

Grant funding for research and development projects of up to £500,000 and up to 60% of project costs are available but figures are dependant on the region.

Venture Capital Investments The Carbon Trust

Minimum award: N/A

Maximum award: up to £4m, 50% of total transaction

Eligibility

Any business or entrepreneur who is involved in 'clean energy technology' can apply. Full criteria are found here:

<http://www.carbontrust.co.uk/emerging-technologies/venture-capital/investment-criteria/pages/investment-criteria.aspx>

Description

The Carbon Trust, through its investments activity, finances emerging clean energy technology businesses that demonstrate commercial potential. Carbon Trust Investments Limited, a wholly owned subsidiary of the Carbon Trust, makes early stage venture capital and seed investments to accelerate the commercialisation of clean energy businesses in the UK. It is a £46m fund, which it invests - leveraged with other private funding - into the UK's clean energy technology industry. CT Investment Partners LLP is the venture capital fund management associate that advises them on their investment activities.

Application Information

To apply, you need to submit a business plan demonstrating a detailed statement of the business's financial position and clear market assessment.

The criteria for the business proposal include the following:

- Be UK based
- Be innovative
- Have a clear financial position demonstrating the economic viability
- Management experience to execute the business plan
- Competitive advantage demonstrating market demands
- Profile key commercial markets
- Demonstrate the intellectual property rights and how they will be protected
- Identify investors who will cover other 50% of the funding

Once you have completed the business plan, please email it to: invest@ctip.co.uk

Energy Efficiency Financing The Carbon Trust

Minimum award: £1,000
Maximum award: N/A

Eligibility

Loans, financing and leases are available to all businesses that have been trading for at least 36 months, subject to normal credit assessment. Assessments are also made on the savings new equipment will make.

Description

Financing is available for any carbon saving processes you undertake. These range from upgrading building insulation or air conditioning, to industrial process technologies. The financing is flexible and payments can be offset against anticipated energy savings. Payments can also be offset against tax. Whilst it is energy efficiency specific, taking out the loan could free up capital for other activities.

Application Process

Applications are started by an online proposal form, followed by a review by Siemens Financial services. Once that is approved, an energy assessor will undertake calculations to support the application. The finance will then be made available.

Contact Details

Email: eef.sfs.gb@siemens.com

Eco Business

Minimum award: N/A

Maximum award: Up to 50% consultancy fee reimbursed & £2400 Grant

Eligibility

Small and Medium companies in the West Midlands (Birmingham & Solihull, The Black Country, Herefordshire, Worcestershire, Staffordshire, Warwickshire & Shropshire) are eligible. Further details on prequalification criteria could be obtained via contact details specified below.

Description

The Eco Business project led by Coventry University Enterprises supports Small to Medium sized businesses in the West Midlands by delivering grant funding for consultancy to develop compliance with environmental legislation and ultimately reduce waste and cut costs. The project will help to create and save jobs, boost productivity and revenue, and encourage increased competitiveness.

Areas which are not limited to include:

- Energy efficiency
- The optimisation of raw materials
- Transport
- Water and energy
- Packaging design and re-use
- Waste and emissions management

Through grant funded specialist consultancy, businesses are being supported to grow and become more environmentally sustainable by looking at their environmental impact and creating practical courses of action to implement changes.

The project offers up to 50% match funding and a further grant of £2400 if costs reach a certain threshold which help to give businesses a competitive edge and aid their transformation to become cost efficient, environmentally friendly and maximise their growth opportunities.

Application Process

Project start - 12 April 2013

Project Completion - 30 Sept 2015

The project works in three stages: initial application, consultancy matching and business support, and in-depth consultancy.

For more information please contact the personnel directly.

Innovation 4 Growth (South West England)

Minimum award £25,000

Maximum award SMEs up to 35% of total project costs and larger companies up to 25% (£150,000)

Eligibility

Eligible operating businesses in the South West of England (Bristol, Cornwall, Devon, Dorset, Gloucestershire, Somerset and Wiltshire) intended to do research and development work which would create and/or safeguard jobs through the development of innovative products, technologies, processes or services. Primarily the scheme aims at small or medium sized enterprises (SMEs), but will also consider applications from large businesses, albeit at lower intervention rates.

Description

Innovation 4 Growth (I4G) is a £4 million grant scheme created with funding from the UK Government's Regional Growth Fund. It is available to support businesses to develop innovative products, processes and services.

Application Information

To apply company needs to complete the I4G [Registration Form](#) providing details of the technology and market area that the project covers. Then the company will receive a unique reference number and an application form.

Projects will be assessed in two batches, with the application deadline for the first funding competition being Monday, 10 March 2014. Later applicants will have less time to carry out their projects, as these must be completed by April 2015, with all associated grants claimed by May 2015.

Further details can be found in the [Guidance for Applicants document \(PDF\)](#).

- Have net assets less than £16 million
- Be doing a deal involving the sale of an equity interest

Restrictions apply to SCF investments for businesses in some sectors (mainly finance or property management related). A full list of eligibility terms and business sector restrictions are available here:

<http://www.scottish-enterprise.com/fund-your-business/Scottish-Investment-Bank/SIB-Equity-Funding/SCIF/SCIF-Rules-and-eligibility.aspx>

Description

The Scottish Co-investment Fund (SCF) is a £72 million equity investment fund that invests from £100,000 to £1 million in company finance deals of up to £2 million. The SCF is managed by the Scottish Investment Bank and is partly funded by the European Regional Development. Unlike a standard venture capital (VC) fund or a business angel, the SCF does not find and negotiate investment deals on its own. Instead it forms contractual partnerships with active VC fund managers, business angels and business angel syndicates from the private sector (the SCF partner). It is these partners that find the opportunity, negotiate the terms and invest themselves. If more funding is required, they can then go to the SCF for further investment on equal terms.

Application Process

All SCF opportunities need to be brought forward by a private sector partner. If you are looking for investment, you must first secure funding from one of these SCF partners. The below directory includes contact details for each partner, so you can contact them directly. The SCF search tool is available here: <http://www.scottish-enterprise.com/fund-your-business/Scottish-Investment-Bank/SIB-Equity-Funding/SIB-investors/scif-search.aspx>

Scottish Venture Fund (SVF) Scottish Enterprise

Minimum award: £500,000
Maximum award: £2 million

Eligibility

To be eligible for investment from the SVF, your company must:

- Be based in Scotland as an incorporated SME
- Have net assets less than £16 million
- Be doing a deal involving the sale of an equity interest

Restrictions apply to SVF investments for businesses in some sectors (mainly finance or property related). A full list eligibility terms and business sector restrictions are available here:

<http://www.scottish-enterprise.com/fund-your-business/Scottish-Investment-Bank/SIB-Equity-Funding/SVF/SVF-Eligibility.aspx>

Description

The Scottish Venture Fund (SVF) invests £500,000 to £2 million, alongside private sector partners, in company finance deals of between £2 million and £10 million. The SVF is managed by the Scottish Investment Bank and is part funded by the European regional Development Fund. The SVF will typically invest through equity instruments but also through mezzanine or debt instruments, provided that the commercial terms are on a matching basis with its private sector partner. The SVF will only invest in companies that have secured funding from one of their private sector partners.

Application process

All SVF opportunities need to be brought forward by one of their private sector partner. If you are looking for investment, you must first secure funding from one of these SVF partners. The below directory includes contact details for each partner, so you can contact them directly. The SVF search tool is available here: <http://www.scottish-enterprise.com/fund-your-business/Scottish-Investment-Bank/SIB-Equity-Funding/SIB-investors/svfpartners.aspx>

Scottish Seed Fund (SSF) Scottish Enterprise

Minimum award: £20,000
Maximum award: £250,000

Eligibility

The SSF is only available to companies that are Scotland based, incorporated SMEs with less than £16million of assets, at least one external equity investor, that are looking to part with equity in a financing deal that is at least 50% sourced from the private sector.

Restrictions apply to SSF investments for businesses in a limited number of sectors (mainly finance or property related). A full list eligibility terms and business sector restrictions are available here: <http://www.scottish-enterprise.com/fund-your-business/Scottish-Investment-Bank/SIB-Equity-Funding/SEED.aspx>

Description

The Scottish Seed Fund (SSF), managed by The Scottish Investment Bank (SIB), is designed to improve the availability of finance for start-up and young growing companies in Scotland. The SSF can invest between £20,000 and £250,000 on an equity basis in early stage businesses that meet the SSF criteria and are keen to grow. Priority is given to businesses demonstrating high-growth potential in terms of launching new products, entering new markets and increasing employment.

The SSF will invest in start-ups and early stage companies at the end phase of product development and/or commercialisation.

Scottish Loan Fund (SLF) Scottish Enterprise

Minimum award: £250,000
Maximum award: £5 million

Eligibility

The SLF will consider Scottish based SMEs with:

- Sustainable operating profits and positive cash generation
- Annual turnover of at least £1 million in the preceding 12 months of trading
- A proven management team operating in a growth sector

Restrictions apply to SLF investments for businesses in a limited number of sectors (mainly finance or property related). A full list eligibility terms and business sector restrictions are available here: <http://www.scottish-enterprise.com/fund-your-business/scottish-investment-bank/scottish-loan-fund.aspx>

Description

The Scottish Loan Fund (SLF) provides [mezzanine loans](#) ranging from £250,000 to £5 million to qualifying Scottish SMEs. The SLF is focused on established businesses that have growth potential or are engaged in exporting from Scotland. The Scottish Investment Bank has provided £55 million of cornerstone funding to the SLF, which is part financed by the Scottish Government, Highlands and Islands Enterprise and the European Regional Development Fund (ERDF). In addition £39.2 million of private sector investment has been generated, giving a cumulative fund value of £94.2 million. Maven Capital Partners has been selected to manage the SLF.

Maven Website: <http://www.mavencp.com/scottish-loan-fund.aspx>

Minimum award: £0
Maximum award: £600,000

Eligibility

Companies interested in applying must be SMEs based in Scotland with a technological advance of significance in its sector. The company must also have the rights to exploit the intellectual property and be in a position to make a commercial success of it but that financial assistance is essential.

Description

SMART: SCOTLAND provides discretionary grants to support technical and commercial feasibility studies, and research and development (R&D) projects.

For studies involving early stage R&D to enable informed decisions on the technical and commercial feasibility of a new product or process, support is available on a discretionary basis at up to 75 percent of the eligible project costs. Projects must last between 6 and 18 months, and the maximum grant is £70,000. One third of the grant is paid upfront when the project starts. The remainder is normally paid quarterly in arrears against claims submitted.

For projects that aim to develop a pre-production prototype of a new product or process, support is available on a discretionary basis at up to 35 percent of the eligible project costs. Projects must last between 6 and 36 months, and the maximum grant is £600,000. The grant is normally paid quarterly in arrears and minimum project costs should be £75,000.

Application process

Applications are initiated and managed online, using the following contact form: https://www.scottish-enterprise.com/~media/SE_2013/Documents/SMART%20SCOTLAND/SMART%20form%20and%20guidance%20notes%20August%202013.pdf

R&D Grant Scottish Enterprise

Minimum award: £0

Maximum award: £40,000 (up to 35% of project costs for SMEs, 25% of project costs for large companies)

Eligibility

Open to all SMEs based in Scotland. The Grant can only be used for projects that represent a significant innovation for the company concerned with a realistic route to market and suitable promise for commercial success. Companies must demonstrate that the grant will provide crucial financial support. Projects where the work has already started or commercial contracts are in place are not eligible.

Description

The R&D Grant supports businesses developing new products, processes and services to improve company competitiveness and to benefit the Scottish economy. Projects must represent a significant innovation for the company concerned and significant risks should be associated with the challenge of developing a new product, process or service. The selection process will also look at the wider picture, accounting for the broader possible impact of the project from securing jobs to how it will affect the environment.

Application process

The application process begins by contacting Scottish Enterprise. The process involves filling out an expression of interest form as well as a project proposal and business plan. These will all be reviewed by both internal and external assessors with both technical and financial expertise to ensure the project will be of a wider local benefit than just to the applicant company.

Angel CoFund

Minimum award: £100k
Maximum award: £1 million

Description

The £50m Angel CoFund was launched in November 2011. The fund has been created with a grant from the Regional Growth Fund and invests alongside business angel syndicates from across England. At Budget 2013, Government announced further £50m for the Fund.

The fund has been designed and established by a consortium of private and public bodies with expertise in business angel investment.

According to the enterprise Minister's announcement, 3 July 2013, the scheme which was previously available to businesses in the specific regions is now open to the organisations across the UK.

Application process

The fund is able to make initial equity investments of between £100K and £1M in to SMEs alongside syndicates of business angels, subject to certain geographical restrictions and an upper limit of 49% of any investment round. Investment decisions will be made by the independent Investment Committee of the fund based on the detailed proposals put forward by business angel syndicates.

The fund is not open to direct approaches from individual businesses and those seeking investment should first secure the interest of the business angel syndicate or network. Businesses seeking investment can find more information on business angels, syndicates and networks from the UK Business Angels Association website www.bbaa.org.uk.

Business Growth Fund

Minimum award: £2m
Maximum award: £10m

Eligibility

The BGF will consider UK based companies with the following characteristics:

- Demonstrate a strong growth trajectory (10%+ annual growth)
- Turnover between £5m and £100m
- Requiring an investment between £2m to £10m

Description

In July 2010, the chief executives of some of the largest UK banks, including Barclays, HSBC, Lloyds, RBS, Standard Chartered and the British Bankers' Association (BBA) set up a Business Finance Taskforce to consider what more could be done to help the UK return to sustainable growth. The initiative followed publication of government's green paper, 'Financing a private sector recovery' in July 2010. The BGF wants to work closely with the companies in which they invest over a 5-7 year period.

The BGF aims to work in partnership with a wide variety of organisations across the UK, forming strategic partnerships with business representative bodies, professional business advisers (including company lawyers and accountants), and national and regional governments.

The BGF is developing excellent working relationships with regional and local business chambers of commerce, business schools, Local Enterprise Partnerships and local councils. The BGF will install regional investment managers and will have strong connections with their local and regional business communities.

Round 5 is now open for bids until midday on 9 December 2013. Up to £300 million will be available with selected bidders announced in spring 2014.

Application process

The application process begins by contacting the BGF directly. The process involves filling out an application form. This will all be reviewed and the BGF will make contact with you.

Contact Details

To start the process please follow the link: <https://www.businessgrowthfund.co.uk/invest/start-the-process>.

Birmingham Post Growth Fund

Minimum award: £10,000
Maximum award: £100,000

Eligibility

The Fund offers grants of between £10,000 and £100,000 for expansion and growth ideas and initiatives that will directly create jobs across Birmingham, Coventry and Solihull between 2012 and 2014.

The grants must be match-funded by the organisation, which must also prove it has been turned down for a bank loan or other support.

Description

The Post will distribute £5 million of Regional Growth Fund cash to help small and medium-sized firms in the region to grow and create jobs.

Application Information

A number of application rounds have been held, with plenty of opportunities for eligible businesses to apply. All of the funding has now been allocated. St Helens Jobs and Growth Fund

Minimum total value of the project £20,000

Maximum award - grants of up to 20% of the total project value

Eligibility

The St Helens Jobs and Growth Fund provides grant funding for businesses planning to expand or invest in St Helens, creating new jobs for local people.

Description

Funded through the Government's Regional Growth Fund, grants of up to £70,000 are available to provide investment for growth, when suitable finance is not available elsewhere. Grants are available for a range of projects that will create new employment opportunities, such as purchasing new premises, expanding current premises or capital expenditure on plant and machinery.

Application Information

If business employs less than 250 people and is planning a capital expenditure project which will lead to the creation of jobs the company can register by completing [expression of interest form](#).

Once the expression of interest form has been evaluated the candidate will be contacted to arrange an initial appointment to discuss completion of the application.

Applications will consider the following factors:

- Eligibility for grant support
- Job creation
- Business performance
- Project outline
- Project costs and funding.

Contact Details

The North West Fund

Minimum award: £50,000
Maximum award: £2million

Eligibility

SMEs based in, or relocating to the North West of England.

For full eligibility criteria, please click [here](#).

Description

The fund is broken down into six individually managed funds that provide debt and equity financing options to SMEs operating in the North West of England looking to develop their business:

- Venture capital
- Development capital
- Business Loans
- Digital Creative
- Energy & Environmental
- Biomedical

Whilst each fund has a specific focus, applications for businesses in all stages of development will be considered for investment. Businesses considered to be in “financial difficulty” will not be considered.

The Fund is financed by a £92.4m grant from the European Regional Development Fund (ERDF) and a matched European Investment Bank loan, under the JEREMIE programme, which is expected to keep the fund open for investment until the end of 2015.

Application process

Applications are submitted online. Following that, the process will involve:

1. Initial review by a respective fund manager
2. Face to face meeting
3. Assessment by fund managers and deal structuring
4. Agreement of investment terms
5. Conduct a due diligence assessment
6. Legal documentation completed
7. Completion
8. Ongoing support and monitoring

For full details, please click [here](#).

Accelerating Business Growth (Lancashire)

Minimum award £20k
Maximum award £150k

Eligibility

Companies based or moving into the County of Lancashire (including Blackburn with Darwen and Blackpool). And planning for growth and the creation of jobs. Applicants should be an SME but larger companies may be eligible subject to additional criteria. The applicant should have received less than 200,000 Euros in public support over the past three years (including the grant amount within this application). Priority will be given to the manufacturing sector and other business-to-business companies.

Description

Accelerating Business Growth (ABG) is a competitive grant scheme that will help to fund business growth projects across Lancashire which commits to: significant job creation, additional investment from other sources, and major impact on the Lancashire economy.

Application Information

Typically, grant is allocated on a 1:4 ratio, 20% of the total project cost. The application and appraisal process is part-subsidised, however all successful applicants will be charged £750 to cover the additional costs of due diligence.

Application process:

- If you are interested in applying for the fund, complete the Expression of Interest form online in the [apply](#) section.
- The Expression of Interest is assessed and if the project is deemed eligible, the applicant will be invited to complete a Full Application.
- Once completed and all supplementary information is gathered and assessed by key personnel, the application is presented to an independent panel for approval.
- Once the application has been approved and payment has been received for Due Diligence expenses, an offer letter will be issued. All grants will be paid based on defrayment of expenditure.

Wales Economic Growth Fund

Phase 1 (March 2013)
Minimum award: £50,000
Maximum award: £100,000

Phase 2 (Autumn 2013)
Awards over £100,000

Eligibility

The Wales Economic Growth Fund operates across the economy. Almost all manufacturing (ICT, Manufacturing, Aerospace, Defence etc) sectors are eligible, as are many service sectors that serve more than just the local market (e.g. Environmental goods and services).

Description

The Wales Economic Growth Fund is a non-repayable grant fund to encourage businesses by supporting projects that stimulate economic growth and create or safeguard employment.

It is a competitive scheme and each project will be judged against internal value for money criteria, which will focus on the number and quality of the jobs created/safeguarded as a result of the project.

Application Information

To register your interest for Phase 1 of the Fund please complete the [online form](#) and send it to wegf@wales.gsi.gov.uk. Phase 1 Expression of Interests will be considered until 1 March 2013. The closing date for the receipt of the interest is 5 April 2013.

Minimum award £4,000

Maximum award £75,000 (funding for any given project will not exceed £15,000 per job created)

Eligibility

Eligible small and medium sized organisations in Derbyshire businesses.

Description

The programme is designed to help SMEs seeking to grow, collaborate, innovate and export to create new employment for local people and attract inward investment to the county.

The Global Derbyshire Small Business Support Programme will support companies to ensure they can access and thrive in global markets. Grants will focus on four key strands:

- Start-up businesses
- Business innovation and development (including supply chain collaboration)
- Companies helping deliver the aims of Digital Derbyshire – the county's biggest ever broadband transformation
- Export promotion.

Application Information

The Global Derbyshire Team will undertake an initial eligibility assessment of your Expression of Interest Form. If your project successfully passes this initial assessment you will be asked to complete a full application form.

D2N2 Unlocking Investment for Growth

Minimum award N/A

Maximum award up to 25% in support of capital investment projects with a minimum overall project value of £200,000

Eligibility

Eligible companies should be based in the Derby, Derbyshire, Nottingham and Nottinghamshire (D2N2) Local Enterprise Partnership area.

Description

The Local Enterprise Partnership for D2N2 has secured £6.8m from the Government's Regional Growth Fund and the European Regional Development Fund to help local businesses grow and create new jobs.

Unlocking investment for growth will be of interest to businesses with a substantial capital investment project that will create long term jobs but who can't quite raise all the finance to purchase the necessary fixed assets.

Application Information

The process is competitive and applications will be rigorously assessed, with priority being given to the 6 key sectors (Bio-science, Food & Drink, Construction, Transport Equipment Manufacture, Low Carbon and the Visitor Economy). However all applications that can demonstrate a well thought out business case, significant job creation and value for money will be considered.

The criteria for assessment will be:

- The overall strength of the business case in terms of deliverability, impact and risk minimisation.
- The number of new sustainable, private sector jobs created.
- The level of private sector investment that is leveraged by the grant funding.
- Eligibility for RGF support - including State Aid compliance.
- Value for money.

Response project

Minimum award N/A
Maximum award N/A

Eligibility

The main criterion is that organisation is SME in Leeds City Region. Please check for all criteria [here](#).

Description

The Response project is an ESF initiative led by Leeds City College and funded via the Skills Support for the Workforce programme. A new scheme has been created with the aim of helping small businesses in the Leeds City Region invest in developing the skills of their workforce. The programme is benefiting from more than £10m of funding from the European Union and UK government which is being made available through the Skills Funding Agency to finance training for people in employment.

The Response Project aims to support employers across the Leeds City Region by providing support and advice on a range of training matters. This could include taking on an apprentice, coaching and mentoring or enabling existing employees to gain new skills so they can support business growth plans.

Application Information

- Contact the Response Hub at Leeds City
- The Response Hub will put you in touch with one of the 28 Delivery Partners, best able to meet your needs. Delivery Partners are located throughout the Leeds City Region and comprise of Further Education Colleges and Private Training Providers
- The Delivery Partner will contact you to discuss your needs in greater detail.
- Working with the Delivery Partner, employers will identify the employees they want to train, and their training will commence subject to eligibility.

Climate Change Agreements

Minimum award N/A

Maximum award discount at the revised rate of 90% for electricity and 65% for other fuels

Eligibility

Operators who hold a CCA are eligible to claim a discount to the Climate Change Levy (CCL) charged on their energy bills. The new scheme started on 1 April 2013 when participants can start claiming their CCL discount at the revised rate of 90% for electricity and 65% for other fuels. Further details could be found in the [operations manual](#).

Eligibility is constrained to specific processes only, these are set out in the Environmental Permitting Regulations, as well as some defined Energy-Intensive processes. SMMT can provide a detailed list on request, or visit our website. Processes include surface treatment of metal, painting, plastic injection moulding and presses.

Description

Climate change agreements (CCAs) are voluntary agreements containing targets for eligible industry sectors to increase energy efficiency or reduce carbon dioxide (CO₂) emissions. CCAs are part of a package of government measures to tackle climate change that are designed to encourage UK business to save energy and reduce carbon dioxide emissions. The package of mechanisms also includes the Climate Change Levy, the EU Emissions Trading System (EU ETS) and the CRC Energy Efficiency Scheme.

Application Information

Accounts in the register are managed by the sector associations on behalf of operators. An application for a CCA must therefore be made via the relevant sector association. For the automotive sector this is SMMT.

Contact Details

To contact automotive sector association please get in touch with Matt Croucher, Economics Manager at SMMT via phone 0207 344 1640 or email mcroucher@smmt.co.uk.

For more information from SMMT please visit the [website](#). This includes the specific processes which are eligible to enter SMMT's CCA and details how to make an application.

Low Carbon Vehicles Integrated Delivery Programme (IDP) TSB

Minimum award } expected total cost of project to be
Maximum award } between £2m and £5m.

Eligibility

The tenth competition under the innovation platform's integrated delivery programme (IDP) aims to integrate the low carbon vehicle innovation chain, from the science base, through collaborative R&D to fleet-level demonstration.

The Fund looks to invest in innovative, business-led projects that strengthen UK capability and develop the UK's supply chain in the field of low carbon vehicles.

Projects must demonstrate technologies that deliver significant reductions in vehicle CO₂ emissions compared to current best-in-class technologies. Each project needs to show how these technologies will bring products to market quickly and demonstrate an ability to build significant supply chain capability within the UK. It should also consider carefully how any intellectual property is handled and secured within the UK, for exploitation by and to the overall benefit of UK plc.

Description

It is a £10m fund to support innovative technologies for low carbon vehicles that address the technical challenges. Projects must be business-led and collaborative. A collaborative project includes one lead partner and at least one project partner.

Application Information

The competition comprises an application and assessment process with selected proposals being invited for presentations to a panel of assessors, the Technology Strategy Board and other key stakeholders.

The competition opens on 4 September 2013 and the deadline for registration is at noon on 6 November 2013. The deadline for application forms, including annexes and finance forms, is at noon on 13 November 2013.

Energy Catalyst – Mid Stage Awards

Minimum award: N/A

Maximum award: up to 60% of total project costs for SMEs or 50% for large (for full award details please visit the [site](#))

Eligibility

The Energy Catalyst is open to innovative businesses and researchers from any sector who can address the three major challenges facing the energy sector:

- reducing emissions
- improving security of supply
- reducing cost.

Description

The Energy Catalyst has been established by the Technology Strategy Board, the [Engineering and Physical Sciences Research Council](#) and the [Department of Energy and Climate Change \(DECC\)](#) to accelerate innovation in the energy sector from concept to pre-commercial readiness by providing investment and support at the time, in the way and at the scale innovators need it. Funding of up to £25m is available for the first round, opening 19 May 2014.

Application Information

Organisations can apply for any stage of funding at any time, depending on where in the development cycle their technology sits.

Early-stage projects must be led by an SME either working alone or collaboratively or by a research organisation collaborating with a business. Mid-stage and late-stage projects must be business-led and collaborative. Total project costs can be up to £300k for early-stage awards, between £500k and £3m for mid-stage awards, and between £1m and £10m for late-stage awards.

The competition opens on 19 May 2014. The deadline for registration for mid-stage awards is noon 27 August 2014 and the deadline for expressions of interest is noon 3 September 2014. The second-stage deadline for invited applications is at noon on 5 November 2014.

Further details concerning the mid-stage application process can be found in the [guidance for applicants](#).

Low Emission Transport Collaborative Project Fund (North East)

Minimum award: £50,000
Maximum award: £300,000

Eligibility

The fund will support collaborations between SMEs with product development support needs, and knowledge based partners such as R&D organisations, businesses, universities, technology partners, customers or partner companies. The fund will provide a contribution towards the project cost and should be matched with a private sector contribution. It is open to organisations looking to create jobs in Tyne & Wear, Northumberland, County Durham or Tees Valley.

Description

The Low Emission Transport Collaborative Project Fund is part of a wider £6.2m Regional Growth Fund programme designed to boost the growth of the low carbon sector within the region. Grant funding decisions will be made by an independent investment panel made up of technical experts, business representatives, business networks, academia and funding specialists. The fund will provide grant funding to collaborative industry-research organisation projects based in North East.

Application Information

The second round of the fund is currently open. It involves two stages application:

Stage 1: Expression of Interest by 10 April 2013. Within two days of submitting completed EOI the organisation will be informed whether they have been invited to Stage 2 of the bidding process. You can [download a copy of the Expression of Interest Form here](#).

Stage 2: Full Application. If EOI is successful the company will be sent by email a copy of the full application form. The deadline for the applications is 24 April 2013.

Low Carbon Innovation Fund (LCIF)

Minimum award £25,000

Maximum award £75,000 or £750,000 (depending on the size)

Eligibility

Eligible SMEs across the East England region.

Description

The Low Carbon Innovation Fund (LCIF) is a venture capital fund which makes early-stage investments as equity or convertible loan between £25K and £750K alongside co-investors. The investee companies must be small or medium enterprises (SMEs) based within the East of England that are developing new and innovative products or processes in a low carbon, environmentally sensitive manner.

LCIF offers two routes to funding depending on the amount required and the stage of the company: the Smaller Investments Scheme, for investments between £25K and £75K, and the Main Fund, for investments between £75K and £750K.

Application Information

The Fund was launched in September 2010 and will run until December 2015. Applications can be made at any time [via this website](#). Registering on the website grants you access to the application portal. You will also receive LCIF's quarterly newsletters, which contain information about LCIF investments and sector news.

Contact Details

Applicants wishing to have an informal discussion about a potential application please call Kevin Murphy at the Fund Manager, Turquoise International, on 020 7248 1506.

Environmental Management Support Initiative (North East)

Minimum award: N/A

Maximum award: N/A

Eligibility

SME businesses based in the North East Region are eligible.

Description

The Environmental Management Support Initiative (EMSI) is a European Regional Development Funded (ERDF) project, focusing on job creation and environmental management within North East businesses.

EMSI has three strings to its bow in supporting businesses in the region: building environmental management systems, calculating a business carbon footprint and simultaneously providing jobs.

The consultancy support for businesses is fully funded by the ERDF, so the participants are able to take a much more active role in their environmental management programme, with the only financial cost being for the 'green' apprentice that they would be required to take on to support the programme.

Panasonic Trust Awards

Minimum award: N/A

Maximum award: up to 50% of course fees

Eligibility

Open to qualified engineers who are EU citizens or have permanent residency in the UK.

Description

This scheme provides grants for professional development and retraining of qualified engineers with a focus on developing understanding and skills of new engineering developments and technologies.

Funding is directed at individuals wishing to study part-time modular Masters' degree courses provided by UK universities, which are designed to develop or update knowledge and skills in new or emerging technologies and fields of engineering, manufacturing, materials science, environmental technology and IT.

Courses employing distance learning or internet based techniques as well as conventional teaching methods are also eligible.

Application Information

Applicants must be supported by both their Course Director/Tutor and line manager at their current employer to confirm that they are suitable for the course and it will benefit their professional development. This information should be submitted in electronic form by email.

Applications should be completed at least four weeks before the commencement of the course to enable a decision to be made in good time. Full details and instructions for applications can be found at:

<http://www.panasonictrust.net/common/instructions.aspx?s=awards>

The award of a grant is entirely at the discretion of the Selection Committee with any decision of the Committee being final on all matters.

Shell Springboard

Minimum award: £20,000
Maximum award: £40,000

Eligibility

To be eligible, businesses need to:

- Be established UK based SMEs or partnerships
- Have a project which is their own and/or which they are free to disclose
- Have a project that has not been previously supported by a Shell Springboard award

Description

Shell Springboard supports innovative low carbon business ideas with a cash injection of up to £40,000. Entrants are divided into three regional areas, the South of England, the North of England and Scotland. Each has a winner who will receive between £20,000 and £40,000. These are then put forward to be named the National Winner. Ideas need to be based around a product or service which will lead to greenhouse gas emissions reductions, is commercially viable and is innovative. Judges also take into consideration the likely material impact that the Springboard award will have on your project and the credibility of the team behind the project.

Application Process

Applications are run through the website on an online form. Applications can be reviewed and amended all the way up to the deadline. Applications are then assessed before short-listing and eventual winners being picked for the three regional events. The three successful winners are then put forward to be judged on the national award.

METRC Innovation Awards

Minimum award £5,000
Maximum award N/A

Eligibility

Any company is able to apply but preference will be given to SMEs.

Full eligibility details listed in the METRC website: <http://metrc.co.uk/fundingcalls/eligibilityrules.aspx>

Description

METRC Innovation Awards support new research and innovation projects between universities (University of Durham, Newcastle and Sheffield) and companies in the fields of Nanotechnology, Science and Engineering. Funding is allocated through a series of calls for applications.

Additional Information

Call 3 will open at 10am on 14 February 2013 and will close at 5pm on 19 April 2013.
Call 4 will open in September 2013 and Call 5 will open in February 2014, subject to funds still being available. Please note that these dates are subject to change.

Application Information

Industry partners with a project idea that are seeking an academic partner from within METRC, should contact the METRC KT Team at info@metrc.co.uk outlining their project idea and technical requirements. The KT Team will identify an academic(s) with suitable research strengths. A proposal will be sent to company and the company will choose their preferred academic or academic partners.

Application Form could be found on the following link:
