Key Dates

SMMT International Group Meetings 2014

Customs & Tariffs Working Group Meetings

Wednesday 17 December 2014

Pre-Christmas networking

CTWG provides a discussion forum for members and non-members to gather in order to consider issues arising from the tax and duty on import and export of automotive vehicles, components and products. There are also presentations on associated topics derived from international trade and members can share market experience, data and information.

International Business Group

Thursday 27 November – 10.30 hrs at SMMT

Pre-Christmas networking at SMMT.

USA, Canada and CEE focus market.

The SMMT International Business Group provides a "window on the world", exploring the latest industry trends and opportunities around the globe. The three-times-yearly meetings target key automotive markets and provide both members and invited guests with the opportunity to hear from local experts, share their own business experiences and network amongst the group.

The next meeting will be held on 27 November at 10:30 hrs at SMMT, when the focus will be on the **USA** and **Canada** - neighbours whose automotive industries appear to be on diverging paths - and also on **Central Europe** - another region where automotive production is on the rise again.

For further information, and to register your interest in attending, please contact Pat Shaw on 0207 344 9260, email pshaw@smmt.co.uk

International Questionnaire: Help us shape 2015/2016 activities!

As mentioned in this month's editorial, we have decided to introduce a more formal international trade survey to better understand your activities in overseas markets. Your feedback will help us align the resources of SMMT and UKTI to support you by providing an evidence base to assist our activity planning. You can download a copy of the International Questionnaire [here](http://www.smmt.co.uk/international-questionnaire/) <http://www.smmt.co.uk/international-questionnaire/> .

Please complete and return the questionnaire to pshaw@smmt.co.uk

SMMT supported International events

Book Now!

SMMT supported event

Supply Chain Trade Mission to Mexico *UKTI support available*

1-5 December 2014

Contact: Pat Shaw | **E-mail** pshaw@smtt.co.uk | **Tel:** 020 7344 9260

A week-long business group visit to Mexico featuring “Mexico’s Auto Industry Conference & Exhibition”, seminars and one-to-one business meetings in key automotive centres in Mexico.

SMMT supported event

Automechanika Shanghai *Sold out*

9-12 December 2014

Contact: Sarah Thevenet | **E-mail** sthevenet@smtt.co.uk | **Tel:** 020 7344 9233

Following the increased interest from UK participants over the last two years, and the growing interest in the show from both exhibitors and visitors, SMMT will again organise a UK Pavilion at Automechanika Shanghai 2014.

SMMT supported event

SIAT, India *UKTI GRANTS of up to £2,500*

Symposium on International Automotive Technology

21-24 January 2015

Contact: Sarah Thevenet | **E-mail** sthevenet@smtt.co.uk | **Tel:** 020 7344 9233

SIAT is a benchmark event and an important forum for presenting the achievements and innovative strengths of the automotive industry. SMMT is working with UKTI to take a group of UK Companies to exhibit at SIAT 2015.

SMMT supported event

ACMA Automechanika New Delhi *UKTI GRANTS of up to £2,500*

26 Feb – 1 March 2015

Contact: Sarah Thevenet | **E-mail** sthevenet@smtt.co.uk | **Tel:** 020 7344 9233

Following our successful participation at ACMA Automechanika New Delhi, and positive feedback from UK participants, SMMT will again organise a UK Pavilion to the show, which is set to grow in 2015.

SMMT supported event

Automechanika Chicago

24 – 26 April 2015

Contact: Pat Shaw | E-mail pshaw@smmt.co.uk | Tel: 020 7344 9260

The Automechanika family of global automotive shows will gain a new member when the inaugural Chicago exhibition is staged between 24 – 26 April 2015.

Strategically located in the heart of the industrial US Mid-West, the show will focus on:

- Parts and components
- Electronics and systems
- Accessories and tuning
- Repair and maintenance
- It and management

It will be complemented by an extensive programme of promotional and networking activities.

SMMT is currently negotiating preferential rates for a British pavilion that will offer UK exhibitors enhanced stand and meeting facilities. We are also applying for UKTI TAP grants that would be worth up to £2,000 for qualifying companies.

At the same time, we need to assess – as soon as possible - the level of industry interest in this new event. If you are potentially interested in joining the UK exhibitor group in Chicago, please contact Pat Shaw – Tel. 020 7344 9260, email pshaw@smmt.co.uk

SMMT supported event

EVS28 - Electric Vehicle Symposium and Exhibition, South Korea

3 – 6 May 2015

Contact: Sarah Thevenet | E-mail sthevenet@smmt.co.uk | Tel: 020 7344 9233

Following the success of British Pavilions to the previous editions of EVS, SMMT will again organise a UK exhibiting group to the show. Please contact Sarah Thevenet to register your interest.

SMMT supported event

Mission to Brazil 2015 tbc

Contact: Pat Shaw | E-mail pshaw@smmt.co.uk | Tel: 020 7344 9260

This will be a group OMIS, to include visits to OEMs, universities, technology parks. The focus will be on low carbon technologies, vehicle efficiency and composites, to meet INOVAR AUTO requirements.

SMMT supported event

Mission to SE Asia – Vietnam and Indonesia

Contact: Sarah Thevenet | **E-mail** sthevenet@smmt.co.uk | **Tel:** 020 7344 9233

Following a successful UKTI/SMMT mission to Thailand and Malaysia in 2014, we are considering organising a mission to Indonesia and Vietnam for 2015 to complete our visit to key SE Asian markets. Get in touch if you are interested!

Partner International events held abroad

UKTI

UKTI runs a range of events for exporters, including seminars in the UK, trade missions to overseas markets and support for attendance at overseas trade shows. Following a government wide move to have a single customer facing website, information on the UKTI website has been transferred to www.gov.uk. This link will take you to the Tradeshow Access Programme (TAP) page on gov.uk: <https://www.gov.uk/tradeshow-access-programme>.

London Chamber of Commerce Events

The LCCI newsletter contains details of the Chamber's forthcoming international events, including a visit by a South Korean business group, focusing on the electronics and security sectors, and a trade mission to Brazil, scheduled for mid-October.

An electronic version of their programme can be found at www.londonchambernewsletters.co.uk.

Great Britain-India Business Convention, CONNECT '14 10-11 October 2014, New Delhi, India

Last year's British Business Group convention in Mumbai attracted over 350 companies from across India and the UK. This year's convention, in Delhi, CONNECT '14, is the premier commercial event of the year in the UK-India relationship. Coming soon after the formation of the new Indian government, it will bring together British and Indian business leaders and leading Government figures. The theme for the event is "looking to new horizons" building on the success of the last few years.

Registration now open at www.britainindiaconvention.com.

Central & Eastern European Automotive Forum 2014 Adam Smith Conferences

21 – 22 October | Marriott Boscolo Hotel | Prague

<http://www.adamsmithconferences.com/2336sme>

15% discount* to all members.

Please quote VIP Code: 2336SM.

French automotive sector: OEM & aftermarket Webinar 6 November 2014 - 9:30 - 10:30 hrs

Free Webinar giving you an in-depth insight into approaching and entering the French market, its key players and opportunities for UK companies. For further information, contact:

Audrey Berte, email: audreyberte@fco.gov.uk To register go to:
<https://attendee.gotowebinar.com/register/5889687225381791489>

Automotive Industry in Brazil: Opportunities for UK companies, sector overview, opportunities and challenges for Low Carbon Vehicles in Brazil – Webinar (free)
11 November Time: 13.00 – 14.00 hrs UK time

UKTI Brazil is hosting a free webinar to share information and key business opportunities in the Automotive Industry in Brazil. This webinar will help UK companies to gain a better understanding of the industry: recent trends, key players and key business opportunities in Brazil. For further information Contact: Julie Yang, UKTI, Assistant Sector Manager – Advanced Engineering. Email: Julie.Yang@fco.gov.uk. To register go to:
<https://attendee.gotowebinar.com/register/7864931279082635777>.

Funding Export

SMMT compiles and publishes a regularly updated **Funding, Finance and Support Guide** that contains details of over 140 funding schemes that may be relevant to automotive companies. The latest edition of the guide can be accessed via the SMMT website.

Asia News Round-up

Extracts from some recent news sources, copyright acknowledged

China: Nissan and Dongfeng form JV for Infiniti in China

22 September 2014, europeautonews.com

Nissan has formed a joint venture with Dongfeng Motor Corp. in China, dedicated to producing premium Infiniti vehicles in the world's biggest automobile market. Nissan, which moved its Infiniti head office to Hong Kong two years ago, is targeting sales of 30,000 units this year in China, an 80 percent jump from a year ago. It aims to sell 100,000 Infiniti cars in China by 2018, over half of which will be locally made, the carmaker added.

GERMANY: Volkswagen plans luxury sedan for China

24 September 2014, by Graeme Roberts, Just-auto.com

Volkswagen plans to launch a new luxury sedan, codenamed 511, under the VW brand and only in China. Reuters, citing anonymous sources, said the model, intended to improve group profit margins, would be launched at the end of 2015. The automaker plans to sell 50,000 a year.

INDIA: Hyundai expects growth in rural areas

24 September 2014, by Graeme Roberts, Just-auto.com

Following Toyota India's recent announcement of a new marketing push in rural areas, Hyundai Motor India said rural sales accounted for 20% of its tally for August 2014, compared with 12% in 2011. In the next few years, the company aims for 30% of its total sales to come from rural markets.

MALAYSIA: 'National carmaker' Proton launches new Iriz subcompact

26 September 2014, by Tony Pugliese, Just-auto.com

Proton launched the Iriz subcompact car in Malaysia on Thursday, hoping it will help the national carmaker regain ground lost to key domestic competitors including Perodua.

The new model comes with a choice of 1.3- and 1.6-litre VVT Euro IV engines and retail prices range from MYR42,438 (US\$13,000) to MYR58,268 (\$17,860).

SOUTH KOREA: Tata and LG in component supply talks

26 September 2014, by Tony Pugliese, Just-auto.com

India's Tata Motors - parent of Jaguar Land Rover - is in talks to source vehicle components from LG group with reports saying high level talks took place in recent weeks. The South Korean electronics giant is a major global supplier of lithium-ion batteries, fuelling speculation that Tata is considering moving into the electric vehicle segment.

SOUTH KOREA: Analysts see hybrid car sales soaring with new government incentives

26 September 2014, by Tony Pugliese, Just-auto.com

Sales of hybrid electric cars in South Korea are expected to accelerate next year with government incentives expected to make some local models actually cheaper to buy than equivalent petrol models.

SOUTH KOREA: Report says EV infrastructure will grow 73%

25 September 2014, by Tony Lewis, Just-auto.com

South Korea's electric vehicle charging infrastructure will grow 72.7% by 2020 to reach 90,000 stations, according to new research. The growth will be driven by demand for rapid-charging outlets and come on the back of the government subsidies for both the hardware and the installation costs.

VIETNAM: Lower import tariffs spark manufacturing exit fears

23 September 2014, by Dave Leggett, Just-auto.com

Fears are being expressed that the end of import tariffs on built-up car imports to Vietnam (under trade agreements) could cause manufacturers with assembly plants to quit Vietnam unless there are compensatory tax breaks from the government. [...]

Reuters noted that Vietnam currently imposes a 50% tariff on fully built-up imported vehicles, but tariffs in the region are planned to be scrapped in 2018. That could mean imports from other countries in the region - such as Thailand and Indonesia - undercut locally made vehicles.

UKTI International Business Opportunities

To receive immediate UKTI Business Opportunity service notifications register at: <http://www.businessopportunities.ukti.gov.uk/home.html?guid=none>

Brazil – Opportunities for manufacturers of components for electric / hybrid vehicles
<http://www.businessopportunities.ukti.gov.uk/uktihome/item/811866.html>

A Brazilian electric vehicle manufacturer is interested in UK-based manufacturers offering technologies for electric/hybrid bus, truck, vans and taxis.

A Brazilian electric vehicle manufacturer is interested in UK-based manufacturers of electric driveline (motors/transmissions), batteries with BMS (Battery Management Systems), inverters/chargers/controllers and transmedia panel with integration with iPod/iPad.

Since then the company has formed partnerships with four groups (three of those foreign) but none of these have been successful. In 2014, the company entered into a partnership with the only Brazilian car manufacturer to develop the 50/50 joint venture under the scheme electric car-sharing & fleet rental services throughout Brazil. The car will not be sold through regular channels; the manufacturer will own the fleet and lease the cars to parking companies and networks that will make the car available through a car-sharing system.

The car-sharing program will begin in the cities of Rio and Curitiba, with initial 50 cars each. Then it will be extended to São Paulo, Belo Horizonte, Recife and Caxias do Sul. The company counts on a demand of 300 cars in each of these cities over time.

The future plans include an electric van and a special car for wheelchair users. The electric motor and battery will be supplied by manufacturers from the United States, England, Canada and China, attested by the English group Lotus, the same one used by Tesla, the American manufacturer of luxury electric vehicles. Deadline: 15 December 2014.

China - Advanced LNG/CNG technology companies sought for cooperation
http://www.cbbc.org/what_we_do/china_business_opportunities/advanced_lng_cng_technology_companies_sought

This Chinese company is a high-tech corporation specialised in researching, developing, manufacturing and other services on compressors, pressure vessels and pressure piping. It now wants to work with British companies that have advanced LNG/CNG technology and equipment. The British company could either provide technology to this Chinese company's production operations or join fabrication with the Chinese company. Closing date:?

China - Automotive maintenance equipment sought for procurement

[http://www.cbbc.org/what we do/china business opportunities/automotive maintenance equipment sought](http://www.cbbc.org/what_we_do/china_business_opportunities/automotive_maintenance_equipment_sought)

A professional automotive after sale service provider in Changchun would like to procure British automotive maintenance equipment. This company is a professional automotive aftersales service provider which owns ten auto maintenance shops across China.

Closing date: 30/10/2014.

China - Robotic machinery sought for automotive equipment manufacturer

[http://www.cbbc.org/what we do/china business opportunities/robotic machinery sought](http://www.cbbc.org/what_we_do/china_business_opportunities/robotic_machinery_sought)

This company is an automotive equipment manufacturer and their main products are automatic binding machines and automatic gluing machines. The company would like to procure robotic products for their automotive manufacturing process.

Opportunity Closing Date: 30/10/2014.

China - A Chinese distributor seeks quick-drying paint for cars

[http://www.cbbc.org/what we do/china business opportunities/chinese distributor seeks quick drying paint](http://www.cbbc.org/what_we_do/china_business_opportunities/chinese_distributor_seeks_quick_drying_paint)

This distributor is a subsidiary of a large state-owned enterprise and has established sales channels in Beijing and Shanghai. It specialises in selling imported automotive products in China and has been the sole agent of several international brands. It would now like to import quick-drying paint for cars in order to replace the baking process. It would prefer to work with manufacturers rather than export companies.

Opportunity Closing Date: 30/10/2014.

Colombia – National Armed Forces looking for transport equipment

<http://www.businessopportunities.ukti.gov.uk/uktihome/item/815300.html>

The Colombian National Armed Forces are looking for a company that offers transport equipment. The required equipment includes ambulances, buses, motorcycles and SUVs with armour-plate. Cost: £1.7 M. Deadline for submissions: 20 October 2014.

Mexico - Large company is looking for retrofit technology suppliers for logistics fleet vehicles

<http://www.businessopportunities.ukti.gov.uk/uktihome/businessopportunity/798340.html>

Mexican market leading beverage company is interested in Retrofit Technology Suppliers for their logistics vehicles with diesel engines to alternative fuels. The company has a large fleet used for the transportation of beverage, food and consumer good to all the country. The company is looking for a cost effective, eco-friendly and sustainable way to reduce emissions through the use of alternative fuels (CNG, LNG and propane, among others). They are interested in talking to suppliers who might provide solutions and services to help them make modification to their vehicles engine and power train.

Mexico – Mexican distributor looks for machinery and new technologies for automotive manufacturing

<http://www.businessopportunities.ukti.gov.uk/uktihome/item/811882.html>

Mexican company expert in representing foreign brands and introducing them in the Mexican and Latin American Markets requires British products to add to its catalogue. The company has twelve years of experience in the field, annual sales of 3 to 4 million U.S. Dollars and 8 direct and 5 indirect employees. The company has offices in Mexico (Chihuahua and Aguascalientes) and in USA (Texas).

Deadline: 3 December 2014.

The Midlands Enterprise Europe Network

If you would like to receive further information about any of the below business opportunities, contact the Midlands Enterprise Europe Network, Tel.: 0121 455 0268, E-mail:

een@birmingham-chamber.com.

A German automotive supplier for high quality and optically efficient light-emitting diodes (LEDs) is interested in new LED developments. They seek research results and prototypes that they can test in their production lines that include chip-on-board technology and PCB assembly. The German company's technology can be adapted to special technologies within technical or research co-operation, e.g. as an industrial partner / end-user in a research project.

Ref: TRDE20140818002

Catalan company specialised in manufacturing and distribution of plastic masking products for professional painters offer itself as a distributor. They are also considering a joint venture or reciprocal production agreements in order to increase its competitiveness and be able to provide a better service and products. **Ref: 20091125036 BR**

A Dutch SME specialised in the development and assembly of high-end shock absorbers is looking for a supplier of electronic components. The potential partner will become part of the developing process and will need to give advise on the configuration and specifications of electronic components like control units, remote controls, graphic displays, sensors, connectors, extension cables.. The SME is interested in a subcontracting agreement.

Ref: BRNL20140805001

Turkish company specialized in designing and manufacturing special vehicles and original high technology products for companies operating in the fields of automotive, automotive supply industry and machinery manufacturing industry, is looking for investors for its own-produced airport utility vehicles. **Ref: BOTR20140821002**

An Austrian research consortium has developed an innovative design of embroidered textile heating elements. The technology is more efficient in automated production of heating elements and it can be applied to (new) products in high and low temperature environments such as those required by the automotive or health industries for example. Partners for a

commercial agreement with technical assistance, a manufacturing or technical cooperation agreement are sought. **Ref: TOAT20140717002**

A French SME, specialized in the design of mechanical products dedicated to sustainable mobility, has developed a breakthrough innovative transmission device. The technology can be implemented to vehicles or any other machinery needing a transmission device for main transmission, energy recovering system, auxiliary motors etc. The company would like to establish a long term partnership through a joint venture or a licensing agreement with industrial partner or collaborate through a H2020 project. **Ref: TOFR20140409002**

A Polish university is offering know-how for the complex preparation process of the surface layer of titanium, aluminium alloys and polyamide 6 (through the process of ozonation) for adhesive bonding. The university is looking for an industrial partner to sign a licensing agreement. **Ref: TOPL20140701001**

A Dutch SME designs and builds intelligent and adaptive beyond-line-of-sight communications for mobile, transportation vehicles or fixed installations. The company has developed a solution for partners who need the ability to send data through either terrestrial 4G LTE (Long-Term Evolution) or satellite Machine to Machine networks to fixed internet locations, mobile devices or cloud servers. The SME is looking for partners active in remote monitoring for a license agreement. **Ref: TONL20140728001**

A Hungarian industrial SME has developed a hydrogen-powered 3kW power supply to provide an uninterruptible resource of electricity for 48 Volt Direct Current (VDC) system lines, specifically for communications relay stations and electric power distributor stations. Its main advantage is the life span being much longer than a traditional battery based power supply. The company looks for partners in the communications and electronic industry for manufacturing and technical cooperation agreement. **Ref: TOHU20140624001**

A Slovak company is one of the leaders of the Slovak engineering market. The company has a long manufacturing tradition. On the basis of its specialised activities, the company holds legal authorizations and certifications as the only subject in Slovakia. The company is in a sound partnership with global leaders of automotive industry and engineering industry. The company is seeking partners for manufacturing agreements or subcontracting. **Ref: BOSK20140811001**

Slovenian manufacturing company, specialized in automotive, electronics and other sectors is looking for industrial or service partners with needs of complex quality injected plastic products and is offering its subcontracting services to EU companies. **Ref: BOSI20140702001**

A Swiss company offers an innovative power semiconductor module, conceived especially for outdoor or on-board applications, because of its ability to withstand high environmental stress like humidity, thermal cycling and mechanical vibration.

Furthermore volume, weight and cost have been reduced. The module has been developed to be fully flexible: any electrical circuit can be integrated while the housing remains the same. Partners sought are willing to co-develop the module on their applications. **Ref: TOCH20140630001**

A Dutch SME with years of experience in developing shock absorbers for use in motorcycles, cars and snowmobiles has developed an innovative proportional damping valve. Faster, more stable and cheaper than current systems on the market. The SME offers this technology to manufacturers of shock absorbers or vehicle manufacturers. The company is interested in development projects from prototype till serial production. The company is interested in license agreements or manufacturing agreements. **Ref: TONL20140811001**

A Polish R&D organization that performs scientific, research and development work in the field of automotive industry problems has developed a holding mechanism for children's transportation in vehicles that increases safety during a side impact. The organisation is looking for partners to sign a license agreement on the developed holding mechanism. **Ref: TOPL20140814001**

An Austrian research consortium has developed an innovative design of embroidered textile heating elements. The technology is more efficient in automated production of heating elements and it can be applied to (new) products in high and low temperature environment such as requested by e.g. automotive or health industries. Partners for a commercial agreement with technical assistance, a manufacturing or technical cooperation agreement are sought. **Ref: TOAT20140717002**

Motor Vehicles – General Requirements

Draft for update of the technical regulation No. GSO 42:2003

SUMMARY:

This standard is concerned with the general requirements for motor vehicles ensuring high levels of safety, environmental protection, energy efficiency and anti-theft performance. For detailed requirements refer to GSO Technical Regulations on the subject concerned. GSO technical regulations related to Motor Vehicles will be formulated based on UN/ECE regulations; In the case of motor vehicles manufactured in compliance with FMVSS regulations, will be accepted as an alternative.

Final date for comments: 60 days from the date of circulation.

JCCC updates

Customs Information Paper (14) 64

Commercial Samples Relief – Changes and New Notice

Commercial Samples Relief is one of several Customs procedures available for trade promotion purposes. The Relief allows established businesses in the UK/EU to import samples of products for demonstration with the sole view to solicit potential orders of those products, provided that the sample items have been adequately prepared prior to import.

Adequate preparation must involve:

- Tearing, altering, perforating, slashing or defacing the items, and/or:
- Using permanent indelible marking or permanent labelling to clearly mark the item as a 'Commercial Sample'.

Any entity established in the EU with a current EORI (Economic Operator's Registration Identification) can continue to use this Relief – any entity that does not have a valid EORI will have to apply for one.

With effect from the date of this CIP, the use of Commercial Samples Relief by 'private individuals' will cease. It should also be noted that as announced previously in CIP (12) 61 the use of dummy EORI 'GBUNREG' is under review and consideration is now being given to its removal from use.

Relevant to All current importers, freight/shipping agents, freight forwarders, brokers and traders who use Commercial Samples Relief via CPCs 40 00 C30 and 49 00 C30. Effective from 1st November 2014.

Customs Information Paper (14) 63

Amendment to the Value Added Tax (Imported Goods) Relief Order 1984

VAT legislation on low value consignment relief for goods sent by mail order from the Channel Islands. Relevant to Individuals and businesses involved in importing goods from the Channel Islands. Effective from 26th September 2014.

Customs Information Paper (14) 62

Temporary Storage and Approved Depositories, Rebranding Approved Depositories to ETSF (AD), Revised Guidance

Clarification of the rebranding of Approved Depositories to External Temporary Storage Facility (Approved Depository) ETSF (AD) plus the revision of associated guidance and Public Notices. Relevant to All international trade economic operators and trade bodies, importers, exporters and shipping agents involved in Temporary Storage and Approved Depositories. Effective: immediate.

Customs Information Paper (14) 59

Volumes 1 and 3 of the Integrated Tariff of the United Kingdom

This paper is to inform you that pdf versions of Volumes 1 and 3 of the Integrated Tariff of the United Kingdom will be published on the gov.uk website on 15 September 2014.

Volume 1 contains information about general Tariff requirements.

Volume 2 contains the Tariff schedule and is already available as the UK Trade Tariff on the gov.uk website.

Volume 3 contains information about customs freight procedures.
Relevant to All those who use the Integrated Tariff of the United Kingdom. Effective from:
Immediate.

Trade shows around the world by month

We are compiling a listing of auto sector-related trade shows around the world as information is received from organisers or from internet searches. The list is not yet complete and will be updated. If you are aware of shows that we should add to the list, or are able to report on the show having previously attended please contact the SMMT International team.
