Monthly Car Production 2001-2002

- Car production rose by 9.8 per cent in September to 144,498 units, bringing the year to date total to 1,242,082 units, up 13.4 per cent on last year.
- Export volumes increased by 22.8 per cent at 90,321 units whilst home market production fell by 6.6 per cent.

Commenting on September car production SMMT chief executive, Christopher Macgowan, said, 'We look set to consolidate our position this year as the second largest European new car market, and production output is expected to reach a healthy 1.6 million units. With the eyes of the world turning to our automotive industry for the British International Motor Show, the fact that one fifth of the Show's debut models have been built at UK plants serves to underpin our position as a world force in car manufacturing.'

Monthly CV Production 2001-2002

- CV production in September was up 14.8 per cent to 19,890 units compared to 17,332 in September 2001. The year to September total at 142,873 was 1.2 per cent lower than last year.
- The growth in exports continued in September, up 37.0 per cent on last year. The recent trend of falling output for the home market eased to -7.8 per cent. Year to date remains 24.8 per cent lower.

Commenting on the provisional figures, Christopher Macgowan said ‘this is good news for the UK CV sector.’ He added, ‘September’s output bettered last September’s very strong total. This is a welcome return to growth following August’s unexpected dip and is a positive contrast to the more subdued growth earlier this year.’
