

Direct demand list
1. Body and Powertrain
1.1 Powertrain
Air cleaners
Camshafts
CV drivetrain
Cooler pipe
Crankshafts
Engine oil coolers
Engine valvetrain
Exhaust systems
Oil pans
Power tailgate system
Radiators
Starter rings (ring gear)
Water coolers
1.2 Body
Aluminium extrusions
BIW / chassis
Carbon composite body panels
Carbon rear mirrors
CV hydraulics (cylinders, rams, booms etc)
Formed meshes
Fuel filler caps
Glass
Heat shields (fuel tank and exhaust)
Hinges
Latches
Mechanical seal
Seal (rubber epdm)
Stampings and pressings
1.3 Chassis, braking, steering and suspension
Brake boosters
Brake systems and components
Clutch pedal assembly (non plastic / non modular)
Coil and torsion springs
Commercial vehicle wheels and tyres
Engine mounts
Suspension ball joints
Suspension bushes
Suspension mounts
Tank system, alu weld or bag tank
Transmission mounts

2. Interior and Exterior
2.1 Interior
Armrests
Carpets
Consoles
Cover stock: PVC material or expanded polypropylene
Fabric for seats
Instrument panel: light guides
Instrument panels
Interior rubber mat
Interior trim: NVH felt
Interior trims (door, sun visors etc)
Internal mirrors (prismatic)
Leather seat covers
Leather trimming
NVH materials
Painted parts
Panoramic roof
Rear seats for SUV
Seals (door, sunroof, window, boot)
Seat air lumbar
Seat belts
Seat components
Veneer and carbon foils
2.2 Exterior
Antennas
Brightware
CV external lighting
Door trim
Keys
Mud wings
Sealing systems
Side door latches
Side door strikers
3. Electrical and electronics
3.1 Electrical
CV electrical
Electric switches: interior
Harness assembly: small wiring assemblies
Heavy vehicle battery cells
Loom
Seat heaters
Switchgear

3.2 Electronics
DOPS - operator presence switches
Electronic control units
Instrument panels (HMI displays and component parts)
Internal lighting (LED systems)
Sensors (gear position, lambda, oil tem, oil pressure)
4. Low carbon/hybrid/EV
Innovative hybrid technologies
Magnet
Power electronics (DC/DC converters, chargers, charge points etc)
5. Processes and tooling
Anodising
Assembly: small pressings / brackets
Automotive fabric cutters
Body colour painting (interior and exterior)
Castings: Aluminium
Castings: Iron
Chroming
Commercial vehicle fabrications
Commercial vehicle piping
Electro-phoretic painting
Extruded parts (aluminium)
Forging
General stampings
General stampings up to 800 Tonnes
Injection moulding (general)
Machined extrusions
Painting metal finishers
Powder coating
RIM moulding
Stainless steel cosmetic finishers
Tube manipulation
Vacuum forming
6. Multi area components
Ceramic coating for exhaust systems
7. Indirect services
Drink vending machines
Ductwork ceaning for the plants
Work wear
Waste disposal

Aftermarket demand list
8. Aftermarket
After sales
Alarm systems
Electric wiring harness system
Exterior and interior injection moulded plastics (grain, paint, chrome finishes)
Exterior styling parts by PU RIM process
Remanufacturing
Stainless steel bars and steps
Stolen vehicle recovery boxes/telematics
R&D Demand list
9. Research and development
9.1 Research and development themes
Innovative new developments
9.2 Design and development services
Advanced engineering and innovation
Engineering services
